Chapter 1

Introduction

1.1 Packing List

Product Name	Package
VSX-DEV-204-PCI	<ul style="list-style-type: none">● Vortex86SX/DX CPU VSX/VDX-DIP-PCI Development board x1● RS232 cable x 2● IDE cable (2.0) x 1● IDE cable (2.54) x 1● GPIO cable x 3

Product Name	Package
VDX-DIP-PCIRD	<ul style="list-style-type: none">● Embedded Vortex86DX DIP 204pin-PCI CPU Module x1

Product Name	Package
PCI-VGA-Z9s	<ul style="list-style-type: none">● XGI Z9S VGA/ DVI PCI board x1

1.2 Product Description

The VDX-DIP-PCIRD family of low-power x86 embedded controller is designed to meet DIP-204pin-PCI specification, and integrated with the following features.

- 800MHz Vortex86DX System-On-Chip
- 256 / 512MB DDR2 system memory
- 4 USB 2.0 (host)
- Up to 5 serial ports
- 16-bit GPIO x2
- 4 PCI bus
- 2 watchdog timer
- Enhanced IDE (UltraDMA-100/66/33)
- JTAG interface
- AMI BIOS
- 4MB SPI flash
- Single voltage +5V DC
- Support extended operating temperature range of -20°C to +70°C

VDX-DIP-PCIRD is suitable for broad range of data-acquisition, Industrial automation, Process control, Automotive controller, AVL, Intelligent Vehicle management device, Medical device, Human machine interface, Robotics, machinery control And more...application that required small footprint, low-power and low-cost hardware with open industry standard such as DIP-204pin-PCI.

For assisting users easily use our DIP-204pin-PCI Module, ICOP provides complete development kit of DIP-204pin-PCI Development Board for DIP-204pin-PCI Module. We also supply our customers with referential circuit diagram for easing user's effort during development process. Meanwhile, you can design your own based board which only equips I/O functions you need. Please visit our website for getting further information: <http://www.dmp.com.tw/tech/vortex86dx/> You also can contact us for getting referential circuit drawing: info@icop.com.tw

1.3 Specifications

■ VSX / VDX-DEV-204-PCI

Features	VSX-DEV-204-PCI
Bus Interface	PCI Bus interface
Connectors	<ul style="list-style-type: none">● 2.54mm 40-pin header for IDE x1● 2.54mm 20-pin header for GPIO x3● 2.54mm 10-pin header for RS-230 x2● 2.0mm 44-pin header for IDE x1● 124-pin slot for PCI x4● External RJ-45 connector for Ethernet x1● External USB connector x4● External 9-pin D-Sub male connector for RS-232 x4● External 6-pin Mini DIN connector for Keyboard x1● External 6-pin Mini DIN connector for Mouse x1● External 3-pin Mini DIN connector for Power x1
Power Requirement	Single Voltage +5V @250mA
Dimension	240 X 160 mm (9.45 x 6.3 inches)
Weight	300g
Operating Temperature	-20°C ~ +70°C -40°C ~ +85°C (Optional)

■ VDX-DIP-PCIRD

Features	VDX-DIP-PCIRD
CPU	DM&P SoC CPU Vortex86DX- 800MHz Real Time Clock with Lithium Battery Backup
Cache	L1:16K I-Cache, 16K D-Cache L2:128KB Cache
BIOS	AMI BIOS
Bus Interface	PCI interface
System Memory	256 / 512MB DDR2 onboard
Watchdog Timer	Software programmable from 30.5 us to 512 seconds x2 sets(Watchdog 1 fully compatible with M6117D)
I/O Interface	<ul style="list-style-type: none"> ● Enhanced IDE port (UltraDMA-100/66/33) x1 ● RS-232 port x5 ● USB port x4 ● 16-bit GPIO port x2
Connectors	<ul style="list-style-type: none"> ● 1.25mm Ø 6-pin Wafer for JTAG x1 ● 2.00 mm Ø 34-pin header for PCI interface x6
Flash Disk Support	<ul style="list-style-type: none"> ● Onboard 4MB SPI Flash Disk (Driver: A)
Power Requirement	Single Voltage +5V @340mA
Dimension	70 X 45mm (2.75 x 1.77 inches)
Weight	23g
Operating Temperature	-20°C ~ +70°C -40°C ~ +85°C (Optional)

■ PCI-VGA-Z9s

Features	PCI-VGA-Z9s
Chipset	XGI Volari Z9s Chipset
Bus	PCI Bus
Video Memory	32MB DDR2 VGA Memory, support resolution up to 1600 x 1200 @ 16M
Connectors	<ul style="list-style-type: none"> ● External 15-pin D-Sub Female connector for VGA x1 ● External DVI Female connector for VGA x1
Operating Temperature	0°C ~ +60°C

0228h - 022Fh	COM7 Forward to LPC BUS	
0238h - 023Fh	COM6 Forward to LPC BUS	
0278h - 027Fh	Printer port (IRQ 7, DMA 0)	
02E8h - 02EFh	COM4 (IRQ 11)	*
02F8h - 02FFh	COM2 (IRQ 3)	*
0338h - 033Fh	COM5 Forward to LPC BUS	
0376h	IDE1 ATAPI device control write only register	*
03E8h - 03Efh	COM3 (IRQ 10)	*
03F0h - 03F7h	Floppy Disk (IRQ 6, DMA 2)	
03F6h	IDE0 ATAPI device control write only register	*
03F8h - 03FFh	COM1 (IRQ 4)	*
0480h - 048Fh	DMA High page register	*
0490h - 0499h	Instruction counter register	*
04D0h - 04D1h	8259 Edge./ level control register	*
0CF8h - 0CFFh	PCI configuration port	*
D400h - D4FFh	on board LAN	*
FC00h - FC05h	SPI Flash BIOS control register	*
FC08h - FC0Dh	External SPI BUS control register (output pin configurable GPIO3[0-3])	*

IRQ Mapping

IRQ#	Description	Usage
IRQ0	System Timer	*
IRQ1	Keyboard Controller	*
IRQ2	Cascade for IRQ8 - 15	
IRQ3	Serial Port 2	*
IRQ4	Serial Port 1	*
IRQ5	USB / Ethernet 10/100M LAN	*
IRQ6	USB	*
IRQ7	Unassigned	
IRQ8	Real Time Clock	*
IRQ9	Serial Port 9	*
IRQ10	Serial Port 3	*
IRQ11	Serial Port 4	*
IRQ12	Mouse	*
IRQ13	Math Coprocessor	*
IRQ14	Hard Disk Controller#1	*
IRQ15	USB	*

DMA Mapping

DMA#	Description	Usage
DMA0		
DMA1		
DMA2	Floppy Disk Controller	
DMA3		
DMA5		
DMA6		
DMA7		

2.6 Watchdog Timer

There are two watchdog timers in Vortex86SX/DX CPU. One is compatible with M6117D watchdog timer and the other is new. The M6117D compatible watchdog timer is called WDT0 and new one is called WDT1.

We also provide DOS, Linux and WinCE example for your reference. For more technical support, please visit: <http://www.dmp.com.tw/tech> or download the PDF file:

<http://www.dmp.com.tw/tech/vortex86dx/>

2.7 GPIO (General Purpose Input / Output)

40 GPIO pins are provided by the Vortex86SX/DX for general usage in the system. All GPIO pins are independent and can be configured as inputs or outputs, with or without pull-up/pull-down resistors.

We also offer DOS, Linux and WinCE example for your reference. For more technical support, please visit: <http://www.dmp.com.tw/tech> or download the PDF file:

<http://www.dmp.com.tw/tech/vortex86dx/>

2.8 SPI flash (Serial Peripheral Interface)

As SPI Flash (Serial Peripheral Interface) offers many benefits including: reduced controller pin count, smaller and simpler PCBs, reduced switching noise, less power consumption, and lower system cost

Many of users may consider using a formatted SPI flash to boot for the system or emulate SPI flash as Floppy (A: Driver or B: Driver). Then you must know how to set for this condition in CMOS Setup and boot up under DOS 6.22, X-DOS, DR-DOS and Free DOS.

For more technical support, please visit: <http://www.dmp.com.tw/tech> or download the PDF file: <http://www.dmp.com.tw/tech/vortex86dx/>

2.9 PWM (Pulse-width modulation)

Pulse-width modulation (PWM) of a signal or power source involves the modulation of its duty cycle, to either convey information over a communications channel or control the amount of power sent to a load.

The popular applications of pulse width modulation are in speed control of electric motors, volume control of Class D audio amplifiers or brightness control of light sources and many other power electronics applications.

The Vortex86DX SoC integrated 32 channels of PWM interface enabling the Automation, robotic industry to a New Age x86 SoC platform and we also offer the sample code of PWM which will guide the engineer to control the PWM functionality smoothly.

For more inquire of this sample code that please contact our sales team or mail to:

info@icop.com.tw

3.0 IDE to SD (MicroSD)

Vortex86DX SoC also built-in simulation circuit to adapt SD to IDE in order to allow your system to recognize Micro-SD card as C: or D: Driver

SD-1917: 44 pins IDE to SD Adapter is an ideal solution for industrial PC or embedded system and 44 pins IDE to SD Adapter can be easily installed on all Vortex86DX-63xx CPU boards. You or your customers just do the BIOS setting and use SD-1917 to connect IDE connector of Vortex86DX-63xx directly.

For further inquiries of SD-1917, please contact ICOP sales team or mail to: info@icop.com.tw for your request.

<BIOS setting>

- Get into the BIOS setup Utility
- Choose Primary IDE Pin Select: SD card
- Press “F10” to Save configuration changes and exit setup

SD-1917

Chapter 4

Driver Installation

VGA

The Vortex86DX processor also use external Display Card “Volari™ Z9s” which is an ultra low powered graphics chipset with total power consumption at around 1-1.5 W. It is capable in providing VGA display output upto 1600x1200. With DVO interface, developers could easily connect flat Panel to support TFT and LVDS output.

Please download the Driver: http://www.xgitech.com/sd/sd_download.asp

LAN

The Vortex86DX processor also integrated 10/100Mbps Ethernet controller that supports both 10/100BASE-T and allows direct connection to your 10/100Mbps Ethernet based Local Area Network for full interaction with local servers, wide area networks such as the Internet.

I/O and IRQ settings can be done by software with the supplied utility software, or it can be set for Plug and Play compatibility. The controller supports: Half / Full-Duplex Ethernet function to double channel bandwidth, auto media detection.

Operating system support

The VDX-DIP-PCIRD “DIP-204pin-PCI” CPU board provides the VGA and LAN drivers for DOS 6.22 Windows CE 5.0, CE 6.0, Windows 98, Windows XP Professional, Windows Embedded standard (XPE) and Windows 2000.

Please get the drivers from the Driver CD which attached with the standard packing of VDX-DIP-PCIRD “DIP-204pin-PCI” CPU board or please get it from DMP official website:

<http://www.dmp.com.tw/tech/vortex86dx/>

VDX-DIP-PCIRD CPU board also supports most of the popular Linux distributions, for more detail information, please visit DMP official website: <http://www.dmp.com.tw/tech/vortex86dx/>

Appendix

A. TCP/IP library for DOS real mode

DSock is a TCP/IP library for DOS real mode, which is used by RSIP. It provides simple C functions for programmer to write Internet applications. ICOP also provide Internet examples using DSock: BOOTP/DHCP, FTP server, SMTP client/server, HTTP server, TELNET server, Talk client/server, etc.

DSock provides a lot of example source code. Programmer can add Internet functions to their project easily and save development time. With a utility "MakeROM", programmer also can make a ROM image to fit their application, those examples can be seen in the following Application systems: Mity-Mite Serial Server, Web Camera Tiny Server and RSIP Serial Server.

DSock is free for All ICOP products using M6117D/Vortex86/Vortex86SX/Vortex86DX CPU and ICOP also provide the business version of DSock for those customers who are using other x86 CPUs.

If you would like to use DSock or business version of DSock, Please mail to info@icop.com.tw or contact your regional sales.

Please download the trial DSock software and Utilities from our website:
<http://www.dmp.com.tw/tech/dmp-lib/dsock/>

B. VDX-DIP-PCIRD & VSX-DEV-204-PCI Schematic

Schematic information can help baseboard designer to optimize exactly how each of these functions implements physically. Designer can place connectors precisely where needed for the application on a baseboard designed to optimally fit a system's packaging.

Please contact or e-mail our regional sales to get VSX-DIP-PCI-V2 , VDX-DIP-PCIRD and VSX-DEV-204-PCI Schematic.

C. BIOS Default setting

If the system cannot be booted after BIOS changes are made, Please follow below procedures in order to restore the CMOS as default setting.

- Press “End” Key, when the power on

- Press to enter the AMI BIOS setup
- Press “F9” to Load Optimized Defaults
- Press “F10” to Save configuration changes and exit setup

Warranty

This product is warranted to be in good working order for a period of one year from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster. Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, originality to use this product. Vendor will not be liable for any claim made by any other related party. Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.
