

**MODEL:
DM-F Series**

6.5"/8"/12"/15"/17"/19"/22"/24" LCD Monitor
DisplayPort, HDMI, VGA, IP 65 Protection, RoHS

User Manual

Revision

Date	Version	Changes
January 21, 2016	1.14	Added 6.5", 8" and 19" model information
August 6, 2015	1.13	Added Section 3.2.8.1: Installing RS-232 Connector
April 29, 2015	1.12	Update Figure 3-2: 3-pin Terminal Block
March 4, 2015	1.11	Update Section 1.6: Technical Specifications Update Section 1.8: Physical Dimensions Update Section 3.4.1: Panel Mounting (cut-out dimensions also updated)
December 23, 2014	1.10	Update to R11 version
June 10, 2014	1.01	Update Section 4.4.1: Panel Mounting
March 25, 2014	1.00	Initial Release

Introduction

1.1 Overview

Figure 1-1: DM-F Series

The DM-F series LCD monitor is the latest member of IEI's line of sophisticated LCD designs with flat bezel. It is designed to fit industrial automation, or any other applications that require minimum installation space and flexible configuration. The flat front panel provides IP 65 protection, which effectively wards off dust and water. Flexible analog or digital interfaces are provided for ease of connection with a management computer.

1.2 Features

The DM-F series have the following standard features:

- Robust IP 65 aluminum front bezel
- Aesthetic ultra-thin bezel for seamless panel mount installation
- Wide range DC input: 9 V – 36 V or 12 V
- Flexible video input solution: VGA, HDMI, DisplayPort or DVI-D
- Resistive single touch or projected capacitive multi-touch options available

DM-F Series Monitor

1.3 Model Variations

The DM-F series LCD monitor base models have a variety of variants. The model variations are listed in **Table 1-1**.

Model Number	LCD	Touchscreen	Power	HDMI	DisplayPort	DVI-D
DM-F65A/R-R10	6.5"	Resistive	12 V	Customized	No	Yes
DM-F08A/R-R10	8"	Resistive	12 V	Customized	No	Yes
DM-F12A/R-R10	12"	Resistive	9~36 V	Yes	Yes	Customized
DM-F12A/PC-R10		Capacitive	9~36 V	Yes	Yes	Customized
DM-F15A/R-R10	15"	Resistive	9~36 V	Yes	Yes	Customized
DM-F15A/PC-R10		Capacitive	9~36 V	Yes	Yes	Customized
DM-F17A/R-R10	17"	Resistive	9~36 V	Yes	Yes	Customized
DM-F17A/PC-R10		Capacitive	9~36 V	Yes	Yes	Customized
DM-F19A/R-R10	19"	Resistive	9~36 V	Yes	Yes	Customized
DM-F19A/PC-R10		Capacitive	9~36 V	Yes	Yes	Customized
DM-F22A/PC-R10	21.5"	Capacitive	9~36 V	Yes	Yes	Customized
DM-F24A/PC-R10	24"	Capacitive	9~36 V	Yes	Yes	Customized

Table 1-1: DM-F Series Model Variations

1.4 Applications

The DM-F series LCD monitor is designed for rigorous industrial environments where it may be exposed to both heat and moisture. Its durability and strength also makes it an ideal choice for public access computers. Some possible applications include:

- Digital surveillance
- Multimedia advertising platform
- General Computing
 - Computer-based testing center
 - General purpose information system
 - Mobile nursing station
 - Interactive education use
- Automation & Control
 - Plant environment monitoring
 - Factory automation HMI terminal

- Shop-floor/MES control
- Self-service Kiosk
 - Full-service receptionist kiosk
 - Hospital self-registration terminal
 - Interactive photo kiosk
 - Video rental kiosk
 - Self-service POS terminal

1.5 Front View

The front of the DM-F series LCD monitor is a flat panel LCD screen surrounded by an aluminum frame.

Figure 1-2 shows a typical monitor front view.

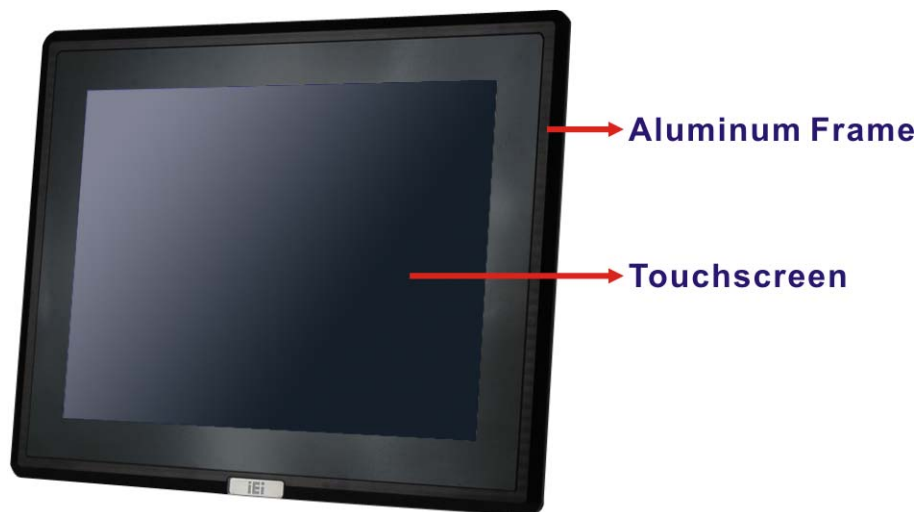

Figure 1-2: Typical Monitor Front View

DM-F Series Monitor

1.6 Rear View

The rear panel provides access to retention screw holes that support VESA mounting. A 5-key/7-key membrane OSD keypad is also located on the rear panel.

The following diagrams show the rear panel of the DM-F series.

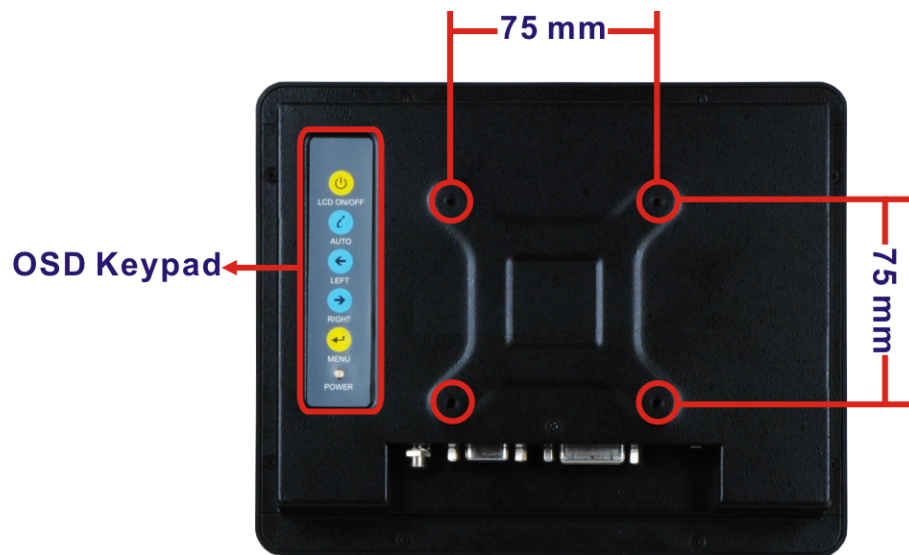

Figure 1-3: 6.5" and 8" Rear View

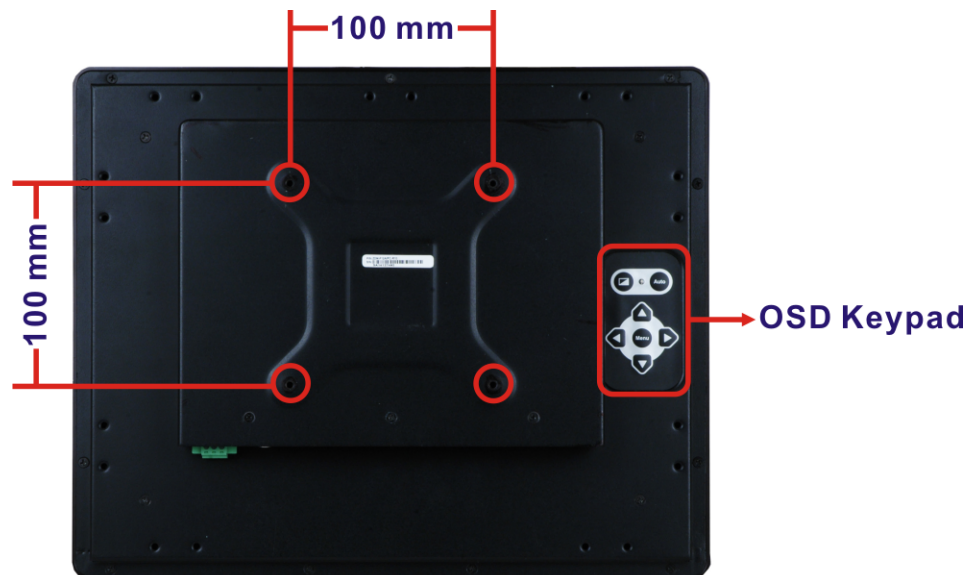

Figure 1-4: 12" – 24" Rear View

1.7 Connectors

The following sections show the I/O interfaces of the DM-F series LCD monitor. All connectors are fully described in **Section 3.2**.

1.7.1 6.5" and 8" Connectors

Unpacking

DM-F Series Monitor

2.1 Unpacking Procedure

To unpack the DM-F series LCD monitor, follow the steps below:

WARNING:

The front side LCD screen has a protective plastic cover stuck to the screen. Only remove the plastic cover after the DM-F series LCD monitor has been properly installed. This ensures the screen is protected during the installation process.

- Step 1:** Use box cutters, a knife or a sharp pair of scissors that seals the top side of the external (second) box.
- Step 2:** Open the external (second) box.
- Step 3:** Use box cutters, a knife or a sharp pair of scissors that seals the top side of the internal (first) box.
- Step 4:** Lift the monitor out of the boxes.
- Step 5:** Remove both polystyrene ends, one from each side.
- Step 6:** Pull the plastic cover off the DM-F series LCD monitor.
- Step 7:** Make sure all the components listed in the packing list are present.

2.2 Packing List

The DM-F series monitor is shipped with the following components:

Quantity	Item	Image
1	DM-F series	
1	USB cable (for touchscreen) (P/N: 32001-006100-100-RS)	
1	VGA cable (P/N: 32000-036200-RS)	
1	Touch pen (resistive touch only) (P/N: 43125-0002C0-00-RS)	
1	60W 12V DC adapter with lockable connector (6.5" and 8" models only) (P/N: 63040-010060-120-RS)	
1	Utility CD (drivers and user manual)	

Table 2-1: Packing List

If any of the above items are missing or damaged, contact the distributor or sales representative immediately.

DM-F Series Monitor

2.3 Optional Items

The following items are optional accessories for the DM-F series monitor:

Item	DM-F65A	DM-F08A	DM-F12A	DM-F15A	DM-F17A	DM-F19A	DM-F22A	DM-F24A
Arm	ARM-11-RS	ARM-11-RS	ARM-11-RS	ARM-31-RS	ARM-31-RS		ARM-31-RS	ARM-31-RS
Stand	STAND-B08	STAND-B08	STAND-A12-RS	STAND-A19-RS	STAND-C19-RS		STAND-C19-RS	STAND-C19-RS
				STAND-B19-RS	STAND-A21-R10		STAND-A21-R10	STAND-A21-R10
Wall Mount Kit	AFLWK-12	AFLWK-12	WK-190MS-R10	WK-190MS-R10	WK-190MS-R10		WK-190MS-R10	WK-190MS-R10
Panel Mount Kit	FPK-04-R10	FPK-04-R10	FPK-01-R10	FPK-01-R10	FPK-01-R10		FPK-02-R10	FPK-03-R10

Installation

3.1 Installation Precautions

When installing the DM-F series LCD monitor, please follow the precautions listed below:

- **Read the user manual:** The user manual provides a complete description of the DM-F series LCD monitor, installation instructions and configuration options.
- **DANGER! Disconnect Power:** Power to the monitor must be disconnected when installing the DM-F series LCD monitor, or before any attempt is made to access the rear panel. Electric shock and personal injury might occur if the rear panel of the monitor is opened while the power cord is still connected to an electrical outlet.
- **Qualified Personnel:** The DM-F series LCD monitor must be installed and operated only by trained and qualified personnel. Maintenance, upgrades, or repairs may only be carried out by qualified personnel who are familiar with the associated dangers.
- **Mounting:** Since the monitor may weigh up to 8 kg (not including a swing arm or other accessories), please ensure at least two people assist with mounting the monitor.
- **Air Circulation:** Make sure there is sufficient air circulation when installing the monitor. Leave at least 5 cm of clearance around the monitor to prevent overheating.
- **Grounding:** The monitor should be properly grounded. The voltage feeds must not be overloaded. Adjust the cabling and provide external overcharge protection per the electrical values indicated on the label attached to the back of the monitor.
- **Anti-static Discharge:** The rear panel of the monitor must to be removed to configure the monitor's AD board. When doing so, be sure the monitor is disconnected from its power source and take all necessary safety precautions to avoid electrocution and static discharge to the AD board. The use of a grounded wrist strap and an anti-static work pad is recommended.

3.2 External Peripheral Device Connection

The external I/O connector pinouts of the DM-F series industrial monitors are described in the following sections.

3.2.1 DC-in Jack

The lockable power connector connects to the power adapter and provides power to the monitor. Supported power voltage is varied among models as described below:

- **DM-F65A/08A:** 12 V
- **DM-F12A/15A/17A/19A/22A/24A:** 9 V – 36 V

Figure 3-1: DC Jack

3.2.2 9 V – 36 V Terminal Block (Optional)

Connect the leads of 9 V – 36 V DC power supply into the terminal block. Make sure that the power and ground wires are attached to the correct sockets of the connector.

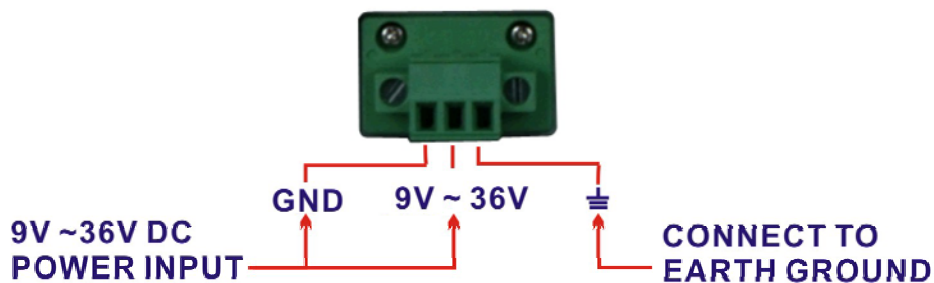

Figure 3-2: 3-pin Terminal Block

DM-F Series Monitor

3.2.3 USB for Touch Panel Connector

Use the rear panel standard USB touch panel connector to connect the monitor to the system graphics interface.

PIN	DESCRIPTION	PIN	DESCRIPTION
1	VCC	2	USB20_N11
3	USB20_P11	4	GND

Table 3-4: USB Touch Panel Connector Pinouts

Table 3-3: RS-232 Touch Panel Connector Pinouts

DM-F Series Monitor

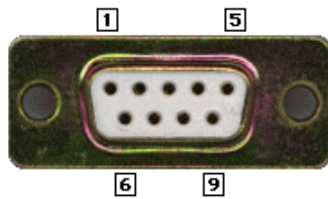

Figure 3-8: RS-232 Touch Panel Connector

3.2.8.1 Installing RS-232 Connector

If the DM-F series doesn't have the RS-232 connector on the side panel, the user can purchase the RS-232 Touch Cable Kit (DM-F-COMKIT01-R10) and install the RS-232 connector onto the system. Please note that the RS-232 port is only available for the resistive type models of the 6.5" – 19" monitors.

Step 1: Remove the rear cover retention screws and lift the rear panel off the monitor.

Figure 3-9: Rear Panel Retention Screw Removal (6.5" & 8")

Figure 3-10: Rear Panel Retention Screw Removal (12" – 24")

Step 2: Remove the RS-232 knockout hole on the side panel.

Step 3: Connect the RS-232 flat cable to the internal RS-232 connector (1x9 pin, RS232_1) on the AD board. See **Figure 3-11**.

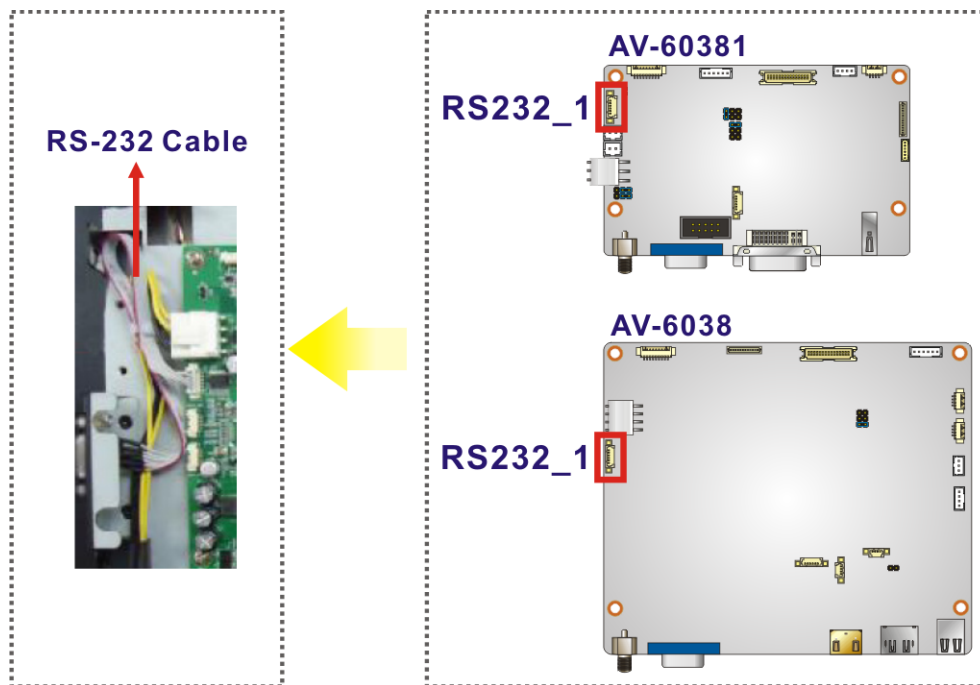

Figure 3-11: Connecting RS-232 Cable

Step 4: Insert the D-sub 9 connector of the RS-232 flat cable into the hole and secure the connector with two hex jack screws.

DM-F Series Monitor

Figure 3-12: Hex Jack Screws for Securing RS-232 Connector

Step 5: Re-install the rear panel.

3.3 Mounting the Monitor

The DM-F series LCD monitor can be mounted in a panel, cabinet, rack or wall. The monitor can also be mounted on a monitor arm or stand. The mounting methods are described below.

CAUTION:

When mounting the monitor take care to tighten the retention screws or bolts until fully secure, but do not over tighten. Over tightening the retention screws or bolts may cause them to become stripped, rendering them useless.

3.3.1 Panel Mounting

Each model of the DM-F series LCD monitor has a series of mounting slots located on the top, side and bottom panels for mounting the monitor to a panel.

Table 3- lists the number of mounting clamps and holders required to mount the monitor to a panel.

Model	Mounting Clamps	Clamp Holders
DM-F65A	8	N/A
DM-F08A	8	N/A
DM-F12A	9	9
DM-F15A	9	9

DM-F17A	9	9
DM-F19A	10	10
DM-F22A	10	10
DM-F24A	12	12

Table 3-6: Panel Mounting Clamps

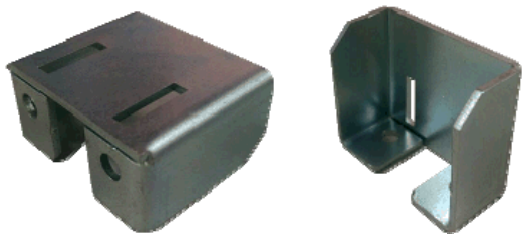

Figure 3-13: Mounting Clamps Holder

Figure 3-14: Mounting Clamps

To mount the DM-F series LCD monitor into a panel, please follow the steps below.

- Step 1: Select the position on the panel to mount the monitor.
- Step 2: Cut out a section of the panel that corresponds to the rear panel dimensions of the monitor. Take care that the panel section that is cut out is smaller than the overall size of the metal frame that surrounds the monitor but just large enough for the rear panel of the monitor to fit through.

DM-F Series Monitor

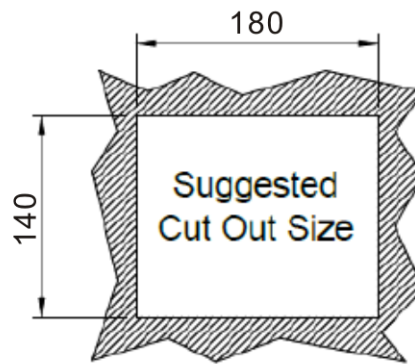

Figure 3-15: DM-F65A Cutout Dimensions (Unit: mm)

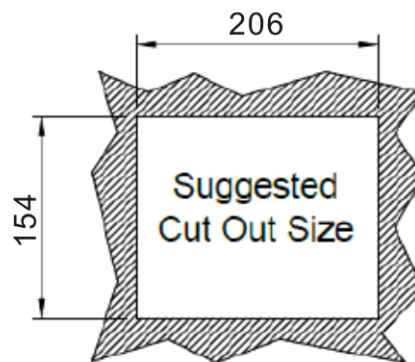

Figure 3-16: DM-F08A Cutout Dimensions (Unit: mm)

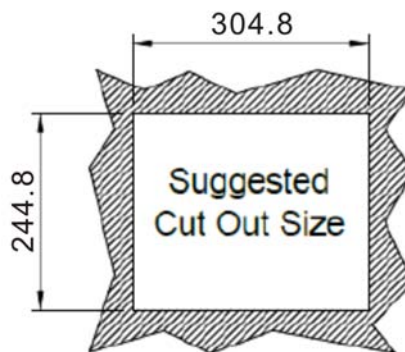

Figure 3-17: DM-F12A Cutout Dimensions (Unit: mm)

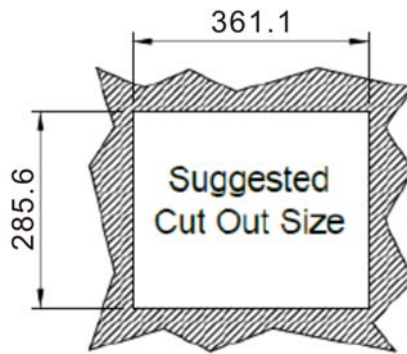

Figure 3-18: DM-F15A Cutout Dimensions (Unit: mm)

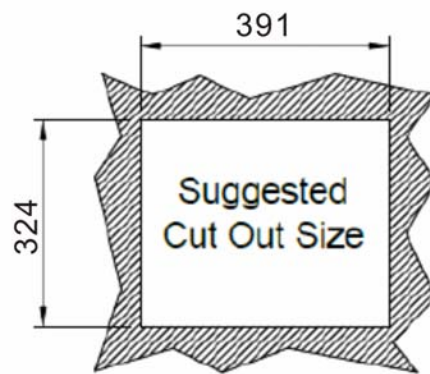

Figure 3-19: DM-F17A Cutout Dimensions (Unit: mm)

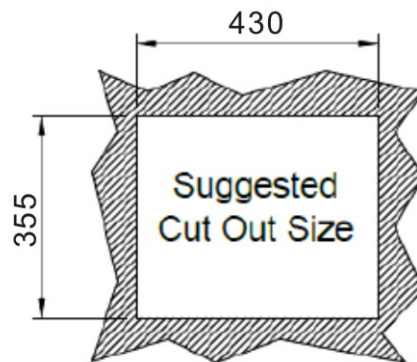

Figure 3-20: DM-F19A Cutout Dimensions (Unit: mm)

DM-F Series Monitor

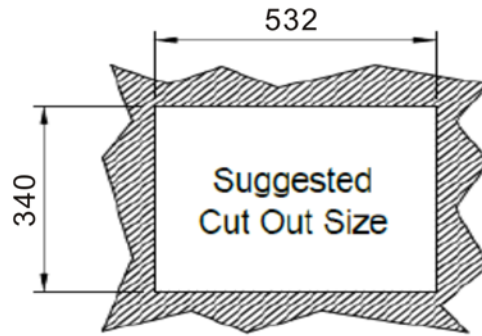

Figure 3-21: DM-F22A Cutout Dimensions (Unit: mm)

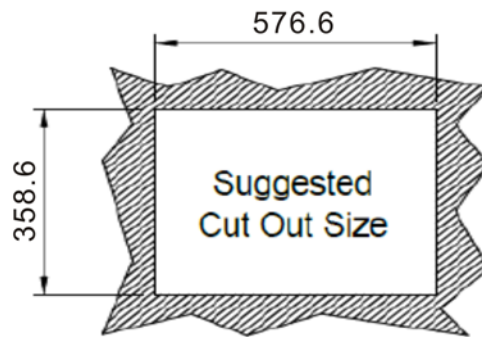

Figure 3-22: DM-F24A Cutout Dimensions (Unit: mm)

Step 3: Secure the mounting clamps holders to the corresponding holes on the rear of the monitor.

**NOTE:**

It is not required to install the clamp holders to the DM-F65A and DM-F08A monitors for panel/rack mounting. After sliding the monitor through the panel, simply insert the panel mounting clamps into the pre-formed holes along the top, side and bottom panels of the monitors. Then, tighten the screws that pass through the panel mounting clamps until the plastic caps at the front of all the screws are firmly secured to the panel.

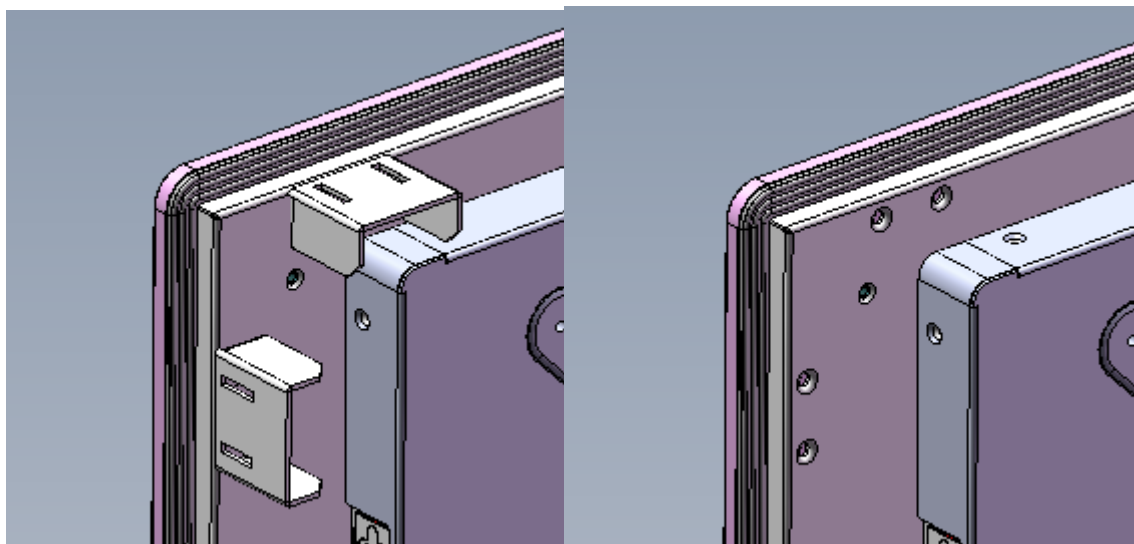

Figure 3-23: Secure the Mounting Clamps Holders

Step 4: Slide the monitor through the hole until the aluminum frame is flush against the panel.

Step 5: Insert the panel mounting clamps into the pre-formed holes of the clamp holders.

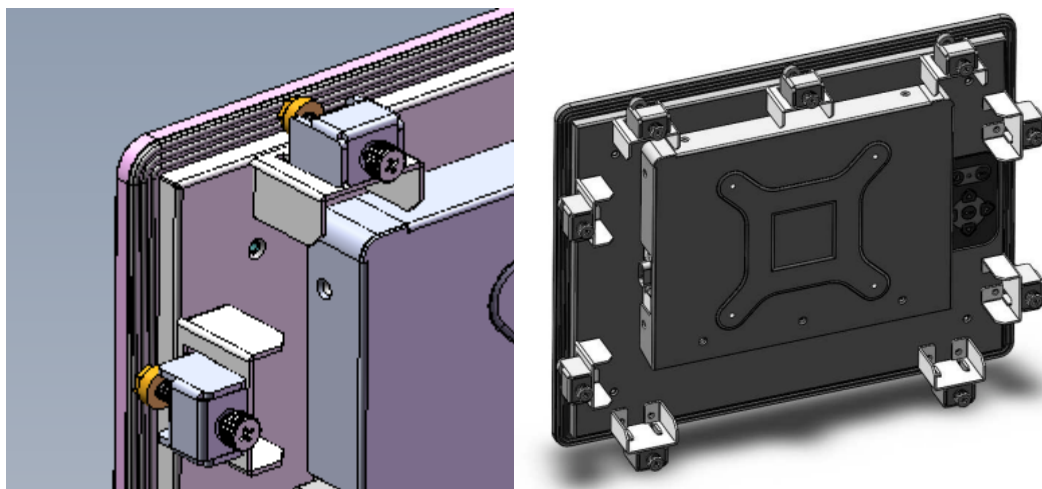

Figure 3-24: Panel Mounting Clamp Position

Step 6: Tighten the screws that pass through the panel mounting clamps until the plastic caps at the front of all the screws are firmly secured to the panel.

DM-F Series Monitor

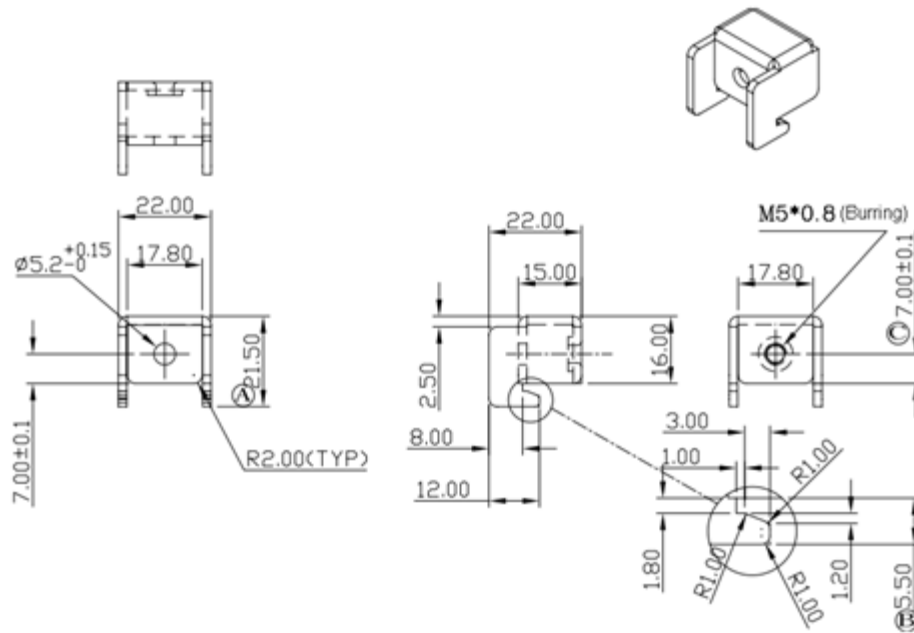

Figure 3-26: Ultra Set Plate Dimensions

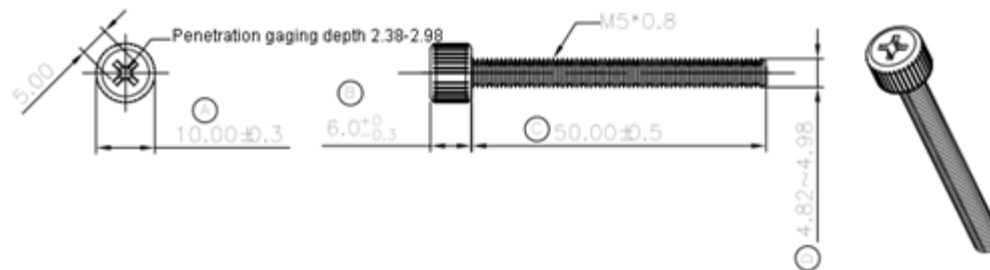

Figure 3-27: Bolt Dimensions

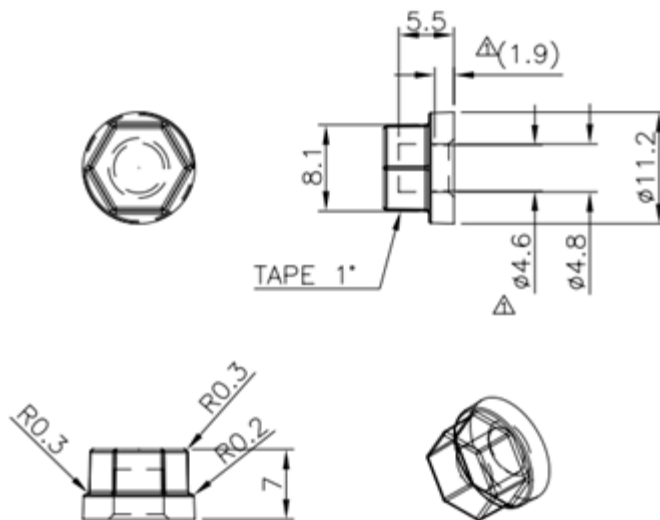

Figure 3-28: Steering Button Dimensions

3.3.2 Cabinet and Rack Installation

The DM-F series LCD monitor can be installed into a cabinet or rack. The installation procedures are similar to the panel mounting installation. To do this, please follow the steps below:

NOTE:

When purchasing a cabinet/rack installation bracket, make sure it is compatible with both the monitor and the cabinet/rack into which the monitor is installed.

- Step 1:** Slide the rear of the DM-F series LCD monitor through the rack/cabinet bracket until the aluminum frame is flush against the front of the bracket (Figure 3-29).

DM-F Series Monitor

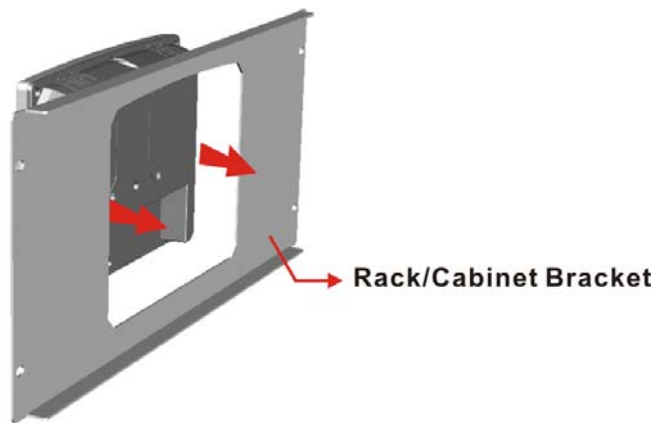

Figure 3-29: The Rack/Cabinet Bracket

Step 2: Secure the rack mounting holders to the rear of the monitor and insert the mounting clamps into the pre-formed holes of the mounting holders (Figure 3-30).

NOTE:

It is not required to install the clamp holders to the DM-F65A and DM-F08A monitors for panel/rack mounting. After sliding the monitor through the panel, simply insert the panel mounting clamps into the pre-formed holes along the top, side and bottom panels of the monitors.

Step 3: Tighten the screws that pass through the rack mounting clamps until the plastic caps at the front of all the screws are firmly secured to the bracket (Figure 3-30).

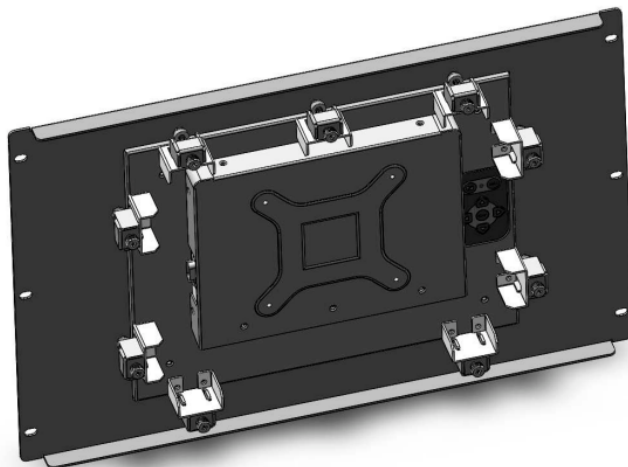

Figure 3-30: Secure the Rack/Cabinet Bracket

Step 4: Slide the LCD monitor with the attached rack/cabinet bracket into a rack or cabinet (Figure 3-31).

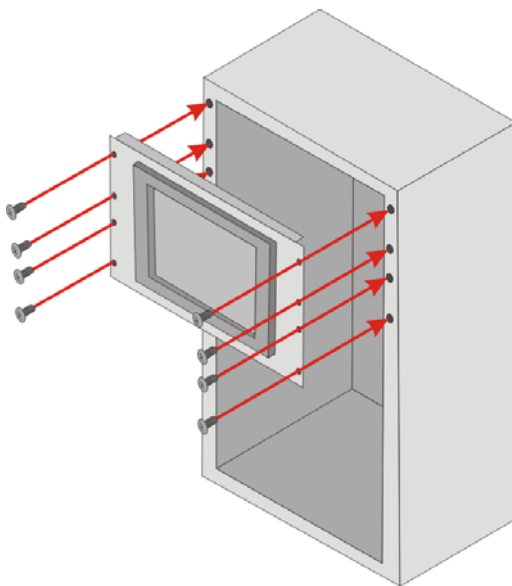

Figure 3-31: Install into a Rack/Cabinet

Step 5: Once the LCD monitor with the attached rack/cabinet bracket has been properly inserted into the rack or cabinet, secure the front of the rack/cabinet bracket to the front of the rack or cabinet (Figure 3-31).

DM-F Series Monitor

3.3.3 Wall Mounting

CAUTION:

Due to safety concerns, it is highly recommended to use the VESA mounting kits provided by IEI for wall, stand and arm mounting. If the VESA mounting kit is purchased separately, please make sure the mounting kit is UL-listed.

Each model of the DM-F series LCD monitor has four holes located on the rear panel for mounting the monitor to a wall. To mount the DM-F series LCD monitor onto a wall, please follow the steps below.

- Step 1:** Attach the wall mounting kit to the mounting surface with the included screws. Make sure it is attached securely (Figure 3-32).

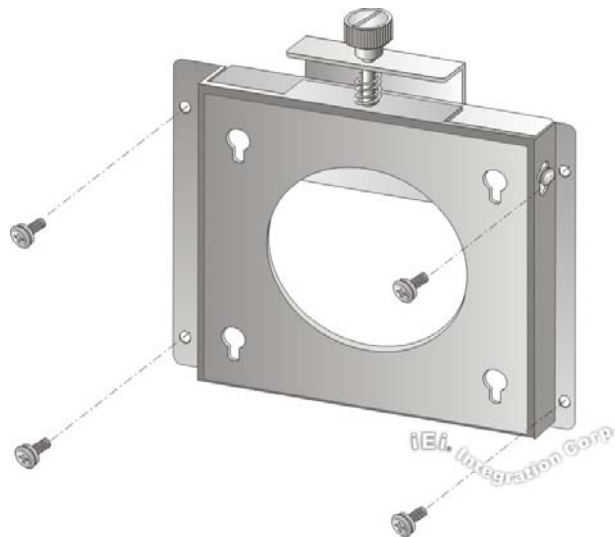

Figure 3-32: Attach Wall Mounting Kit to the Wall

- Step 2:** Screw the mounting screws to the mounting holes on the rear of the DM-F series (Figure 3-33).
- Step 3:** Hook the DM-F series into the mounting holes on the wall mounting kit (Figure 3-33).

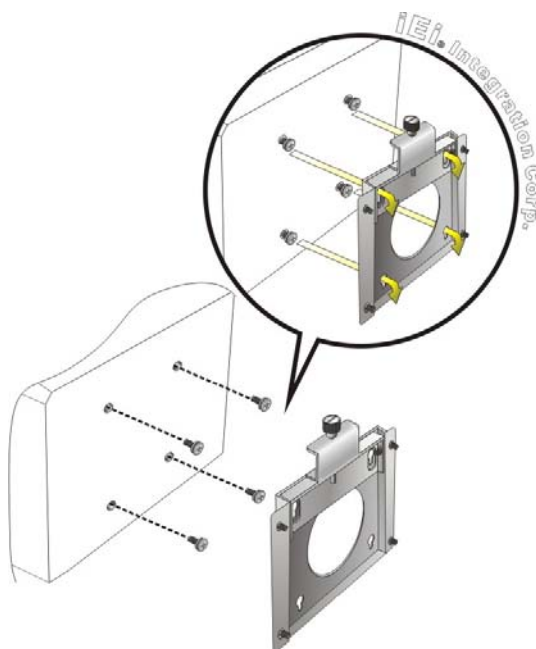

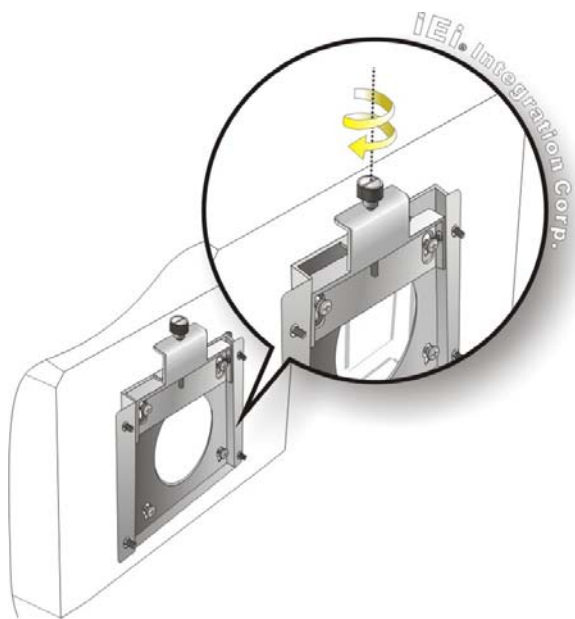

Figure 3-33: Hook Onto Wall Mounting Kit

Step 4: Tighten the top screw on the wall mounting kit to securely hold the DM-F series in place. After this screw is tightened, the DM-F series should not be able to move.

DM-F Series Monitor

Figure 3-34: Tighten Retention Screw

3.3.4 Stand Installation

The DM-F series LCD monitor has Video Electronics Standards Association (VESA) standard mounting holes tapped into the rear panel. The standard holes are M4 set at 75 mm x 75 mm or 100 mm x 100 mm apart (Figure 3-35 and Figure 3-36).

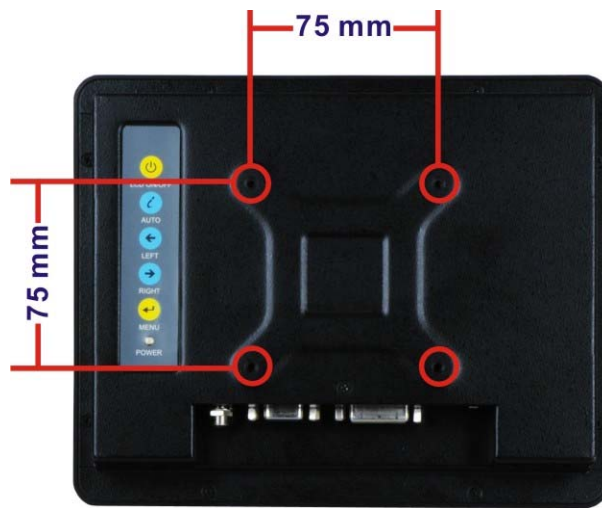

Figure 3-35: VESA Mounting Holes (6.5" & 8")

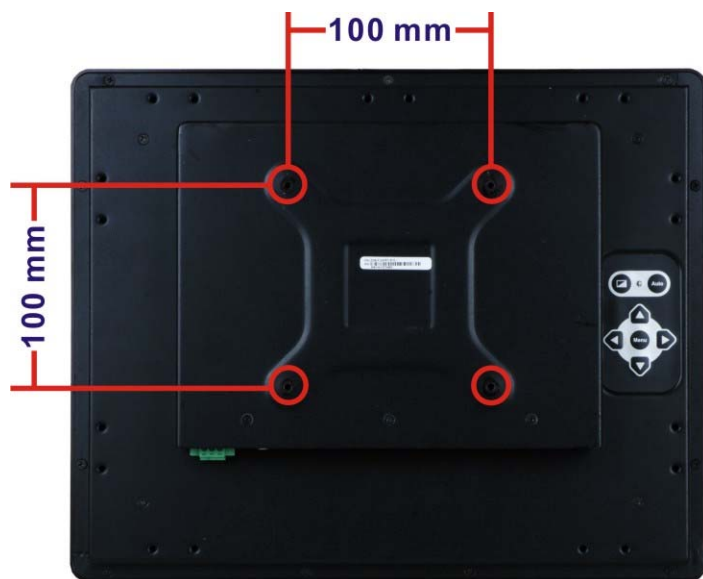

Figure 3-36: VESA Mounting Holes (12" – 24")

To mount the DM-F series LCD monitor onto a stand, please follow the steps below.

- Step 1:** Line up the threaded holes on the monitor rear panel with the screw holes on the monitor stand mounting plate.
- Step 2:** Secure the monitor to the stand with the supplied retention screws (Figure 3-37).

DM-F Series Monitor

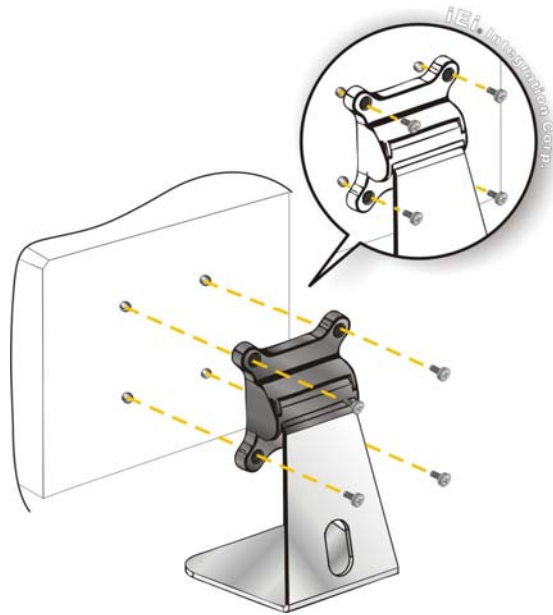

Figure 3-37: Monitor Stand Mounting

3.3.5 Arm Installation

The DM-F series LCD monitor has VESA standard mounting holes tapped into the rear panel. The standard holes are M4 set at 75 mm x 75 mm or 100 mm x 100 mm apart (Figure 3-35 and Figure 3-36). To mount the DM-F series LCD monitor onto a monitor arm, please follow the steps below.

Step 1: Line up the threaded holes on the monitor rear panel with the screw holes on the monitor arm mounting plate.

Step 2: Secure the monitor to the arm with the supplied retention screws (Figure 3-38).

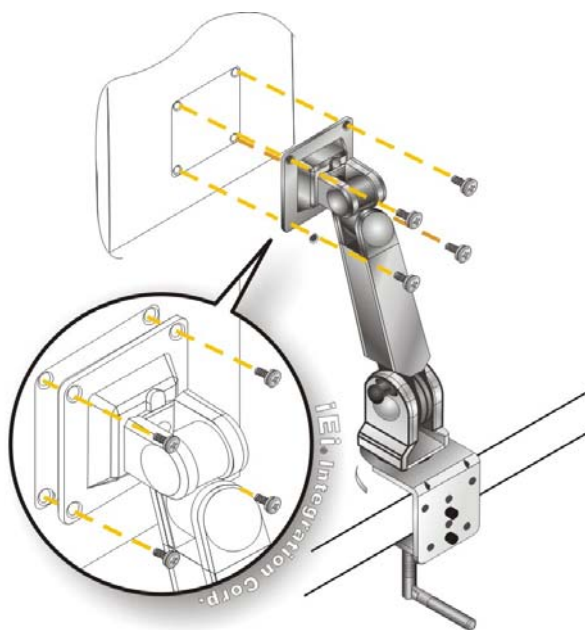

Figure 3-38: Monitor Arm Mounting

On-Screen-Display (OSD) Controls

4.1 OSD Keypad

There are several on-screen-display (OSD) control buttons of the OSD keypad on the monitor rear panel. Figure 4-1 shows the 5-key membrane OSD keypad of the 6.5" and 8" LCD monitors.

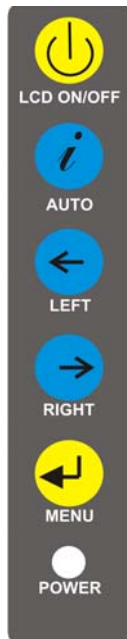

Figure 4-1: OSD Keypad for 6.5" and 8" Monitors

The function of each button is described in the following table.

LCD ON/OFF	Press this button to turn on or turn off the LCD screen.
AUTO	Press this button to automatically adjust the screen. When inside a menu, press this button to confirm the selection of the item.
LEFT	Press this button to decrease the value, or to scroll up from one selected item to another.
RIGHT	Press this button to increase the value, or to scroll down from one selected item to another.
MENU	Press this button to open the OSD window, exit the main menu or the current menu.

Table 4-1: OSD Control Buttons for 6.5" and 8" Monitors

DM-F Series Monitor

Figure 4-2 shows the 7-key membrane OSD keypad of the 12" – 24" LCD monitors.

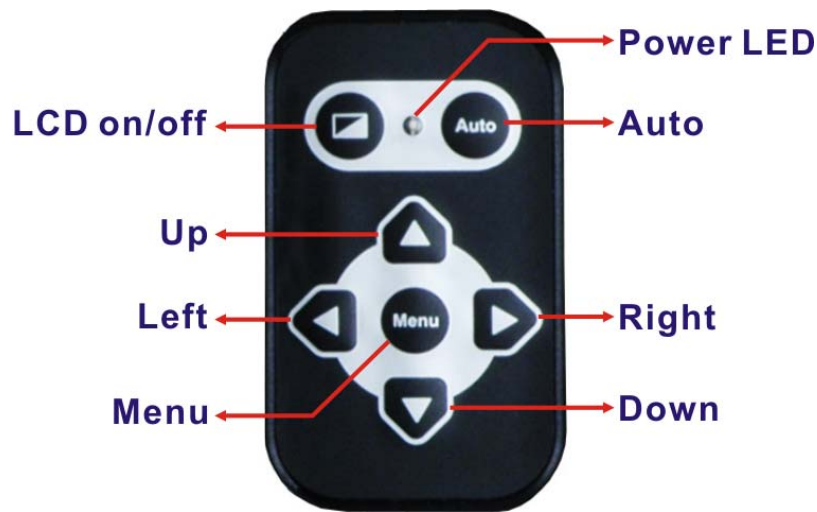

Figure 4-2: OSD Keypad for 12" – 24" Monitors

The function of each button is described in the following table.

LCD on/off	Press this button to turn on or turn off the LCD screen.
Auto	Press this button to automatically adjust the screen.
Menu	Press this button to open the OSD window, exit the main menu or the current menu.
Left	Press this button to increase the value. When inside a menu, press this button to enter the submenu or confirm the selection of the item.
Right	Press this button to decrease the value.
Up	Press this button to scroll up from one selected item to another.
Down	Press this button to scroll down from one selected item to another.

4.3 Using the OSD

OSD menu options are described below.

4.3.1 Image Menu

Image menu features are shown in **Figure 4-3**.

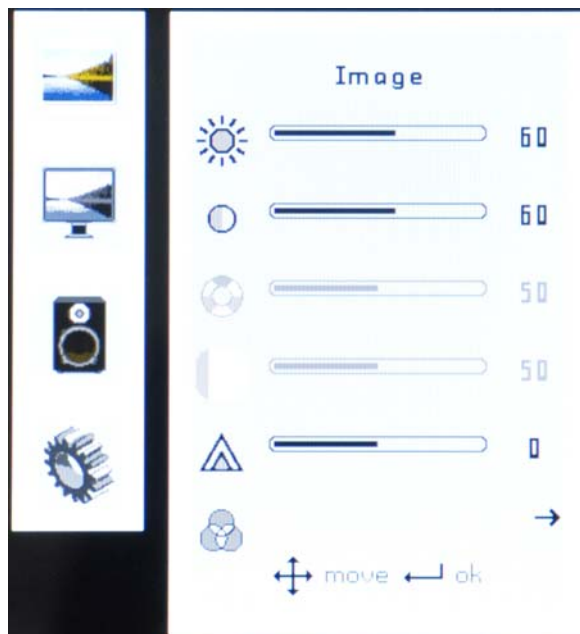

Figure 4-3: Image Menu

Brightness	The brightness option adjusts the brightness of screen. This function adjusts the offset value of ADC. Setting this value too high or too low will affect the quality of image.
Contrast	This function adjusts the gain value of ADC. Adjusting this value too high or too low will worsen the quality of image.
Sharpness	Adjusts the sharpness level. This option softens the edges around objects on the screen.
Color	Provides options for color settings. (Figure 4-4)

4.3.1.1 Color Setting

Color settings are shown in **Figure 4-3**.

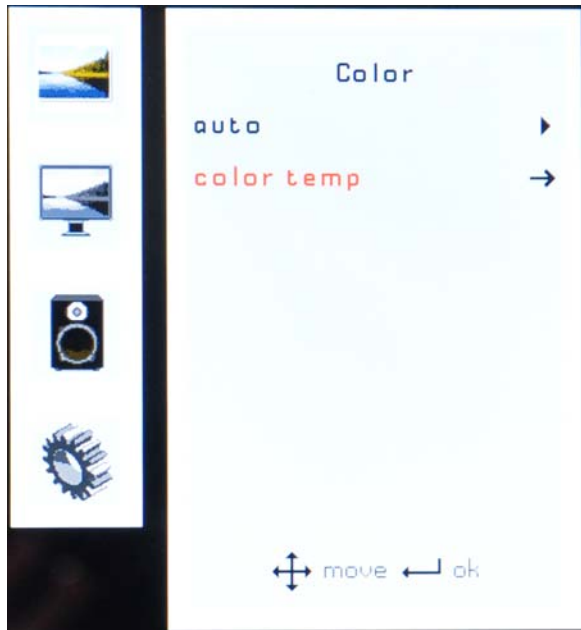

Figure 4-4: Color Settings

auto Automatically adjusts the color settings.

Color temp This item allows adjustment of the following items.

- **5000k** – NTSC standard Kelvin
- **6500k** – NTSC standard Kelvin
- **9300k** – NTSC standard Kelvin
- **User** – This item allows fine-tuning the balance among Red, Green, and Blue color hues if images look garish or unrealistic.

DM-F Series Monitor

4.3.2 Display Menu

Display menu features are shown in **Figure 4-5**.

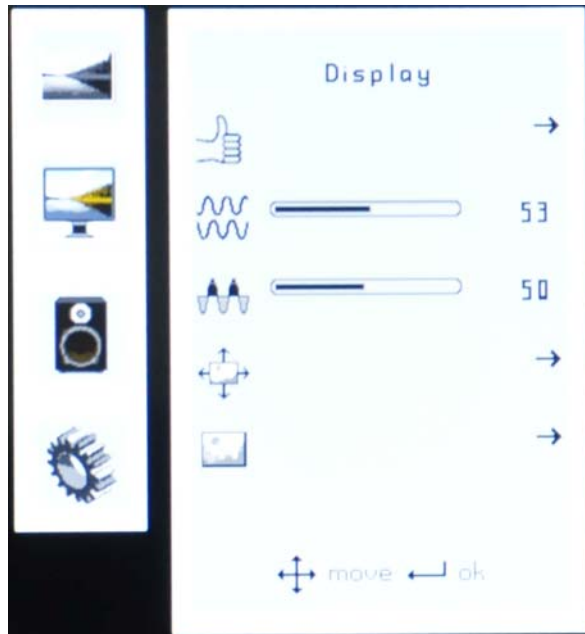

Figure 4-5: Display Menu

- | | |
|-------------------------|--|
| Auto Adjust | Automatically adjusts the LCD screen position. |
| Phase | Adjusts the input signal (analog only) |
| Clock | Adjusts the dot clock position |
| Display Position | Adjusts the horizontal and vertical position of the display screen |
| Display Mode | This item allows adjustment of the Gamma. |

4.3.3 System Menu

System menu features are shown in **Figure 4-6**.

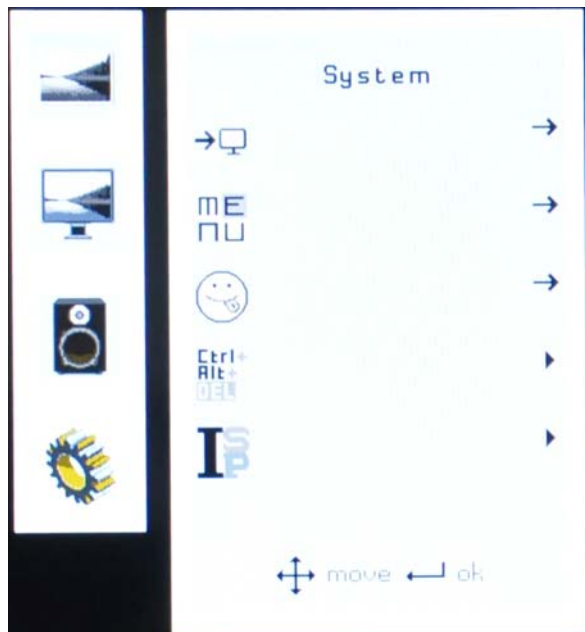

Figure 4-6: System Menu

Input	Allows selection of input device to use. (Figure 4-7)
OSD Settings	Provides options for OSD configuration. (Figure 4-8)
Information	Provides information on the LCD monitor, such as firmware version, release date and input resolution.
Reset	Restores the default OSD settings. Note that this will restore all default display settings.

DM-F Series Monitor

4.3.3.1 Input

Input options are shown in **Figure 4-7**.

Figure 4-7: Input Options

Input options are described below.

Display Port	This item sets the input device to display port.
VGA	This item sets the input device to VGA.
HDMI	This item sets the input device to HDMI.
autoscan	Selects the input device to use automatically.

4.3.3.2 OSD Settings

The OSD settings are shown in **Figure 4-8**.

Figure 4-8: OSD Settings Menu

OSD settings are described below.

Timer	Determines how many seconds the OSD screen stays on screen before it disappears when OSD is left unattended.
Rotation	Adjusts the OSD rotation angle on the screen.
Position	Adjusts the OSD position on the screen.
Transparency	Adjust the transparency of the OSD menu background.

5

Software Drivers

5.1 Introduction

The touch panel controller enables analog resistive touch panels for four-wire, five-wire & eight-wire models. The controller directly communicates with the PC system through the touch panel communications interface. The controller design is superior in sensitivity, accuracy, and friendly operation. The touch panel driver emulates the left mouse button and the right mouse button functions.

The touch panel driver supports the following operating systems:

- Microsoft® Windows® versions:
 - Microsoft® Windows® 2000
 - Microsoft® Windows® XP
 - Microsoft® Windows® 2003
 - Microsoft® Windows® 2008
 - Microsoft® Windows® Vista
 - Microsoft® Windows® 7
 - Microsoft® Windows® 8
- Microsoft® Windows® CE versions:
 - Microsoft® Windows® CE 4.2
 - Microsoft® Windows® CE 5.0
 - Microsoft® Windows® CE 6.0
- Linux Kernel 2.6
- DOS

Driver installation is described below.

5.2 RS-232 or USB Touchscreen

Before installing the driver, connect the DM-F series monitor to the motherboard. The DM-F series monitors support touchscreen modality through a USB or an RS-232 interface connection. Decide through which interface the touchscreen is to be controlled.

DM-F Series Monitor

NOTE:

The default touchscreen interface for the DM-F series monitor is USB interface. The RS-232 interface is only reserved for the models with resistive type touchscreen.

- **RS-232 Interface:** If the touchscreen interface connection is an RS-232 connection, connect the RS-232 connector on the single board computer to the DB-9 connector of the DM-F series monitor.
- **USB Interface:** If the touchscreen interface connection is a USB connection, connect the USB connector on the single board computer to the external USB port connector of the DM-F series monitor.

5.3 Touch Panel Driver Installation

WARNING:

Before the touchscreen driver is installed, make sure the system is connected to the monitor with a USB cable or an RS-232 null cable. Also, make sure the VGA connector on the system is connected to the VGA connector on the bottom of the monitor.

To install the touch panel driver for the DM-F series, please follow the instructions below:

- Step 1:** Connect the DM-F series monitor to the single board computer. See above.
- Step 2:** Install the driver CD. Install the driver CD into the system to which the DM-F series monitor is connected.
- Step 3:** Select the **Touch Screen** option in the menu of driver CD. The directory in **Figure 5-1** appears.

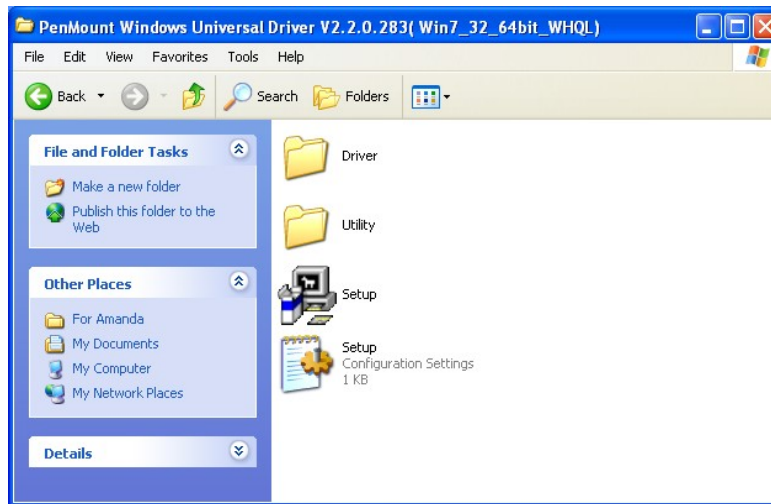

Figure 5-1: Setup Icon

Step 4: Double click the setup icon in **Figure 5-1**.

Step 5: The Welcome screen in **Figure 5-2** appears.

Figure 5-2: Welcome Screen

Step 6: Click **Next** to continue.

Step 7: The license agreement in **Figure 5-3** appears. Accept the terms of the agreement by clicking **I Agree**.

DM-F Series Monitor

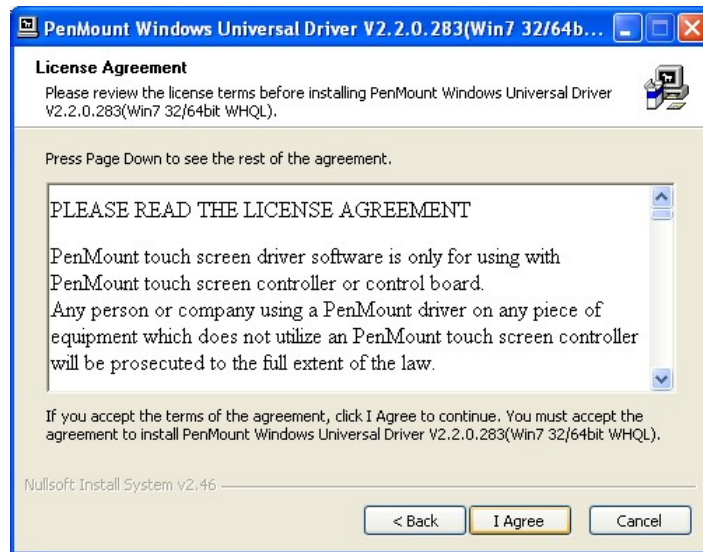

Figure 5-3: License Agreement

Step 8: The installation destination screen appears. See **Figure 5-4**. Click **Install**.

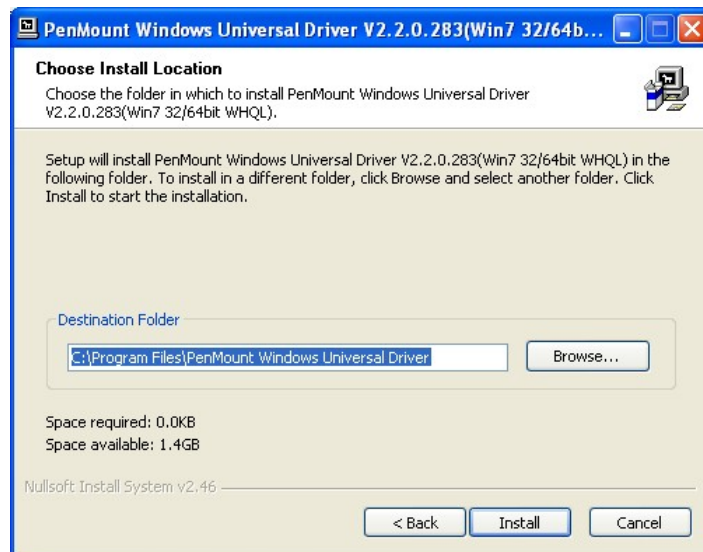

Figure 5-4: Initiate Install

Step 9: The installation of the program begins. See **Figure 5-5**.

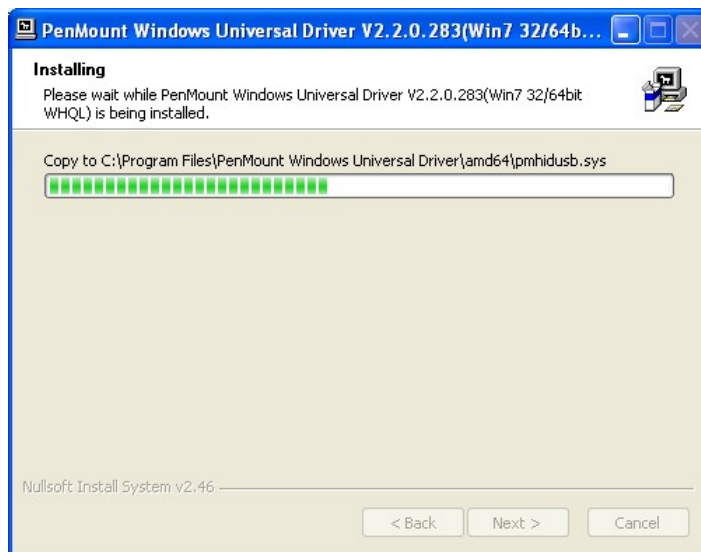

Figure 5-5: Installation Starts

Step 10: When the installation is complete, the complete screen appears. See **Figure 5-6**.

To complete the installation process click **Finish**.

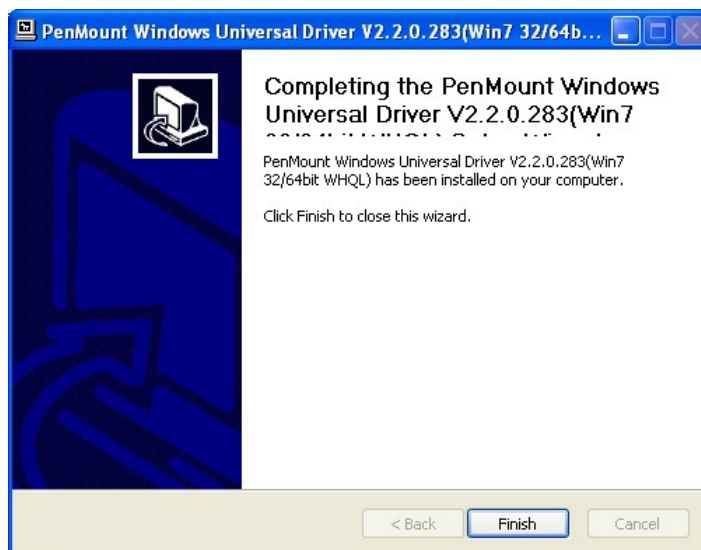

Figure 5-6: Finish Installation

DM-F Series Monitor

5.4 Change the Touchscreen Interface

If the touchscreen interface must be changed from a USB interface to an RS-232 interface or from an RS-232 interface to a USB interface, the following steps must be followed.

- Step 1:** Uninstall the touchscreen driver
- Step 2:** Remove the interface cable i.e. remove the USB cable or the RS-232 cable
- Step 3:** Install the new cable i.e. install the RS-232 cable or the USB cable.
- Step 4:** Reinstall the driver CD as described above.

5.5 Calibrating the Touchscreen

To calibrate the touchscreen cursor with the motion of the touch pen (or finger), please follow the steps below:

- Step 1:** Make sure the system is properly connected through a USB or an RS-232 interface to the DM-F series monitor.
- Step 2:** Make sure the touchscreen driver is properly installed.
- Step 3:** Locate the PenMount Monitor icon in the bottom right corner of the screen.

Figure 5-7: PenMount Monitor Icon

- Step 4:** Click the icon. A pop up menu appears. See **Figure 5-8**.

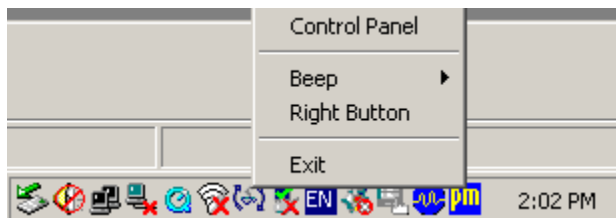

Figure 5-8: PenMount Monitor Popup Menu

Step 5: Click Control Panel in the pop up menu shown in **Figure 5-8**.

Step 6: The configuration screen in **Figure 5-9** appears.

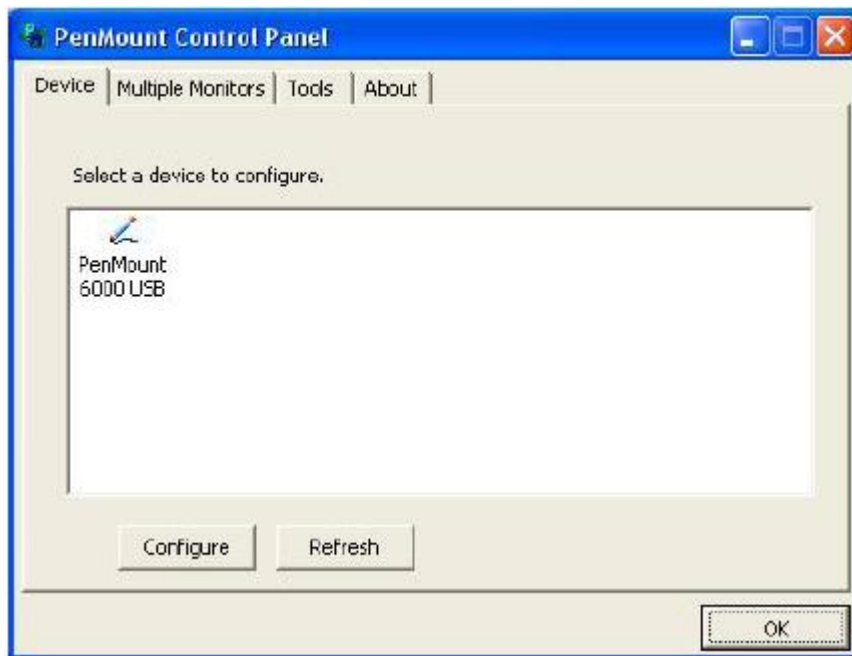

Figure 5-9: Configuration Screen

Step 7: Double click the PenMount 6000 icon as shown in **Figure 5-9**.

Step 8: The calibration initiation screen in **Figure 5-10** appears.

Step 9: Select the Standard Calibration button as shown in **Figure 5-10**.

DM-F Series Monitor

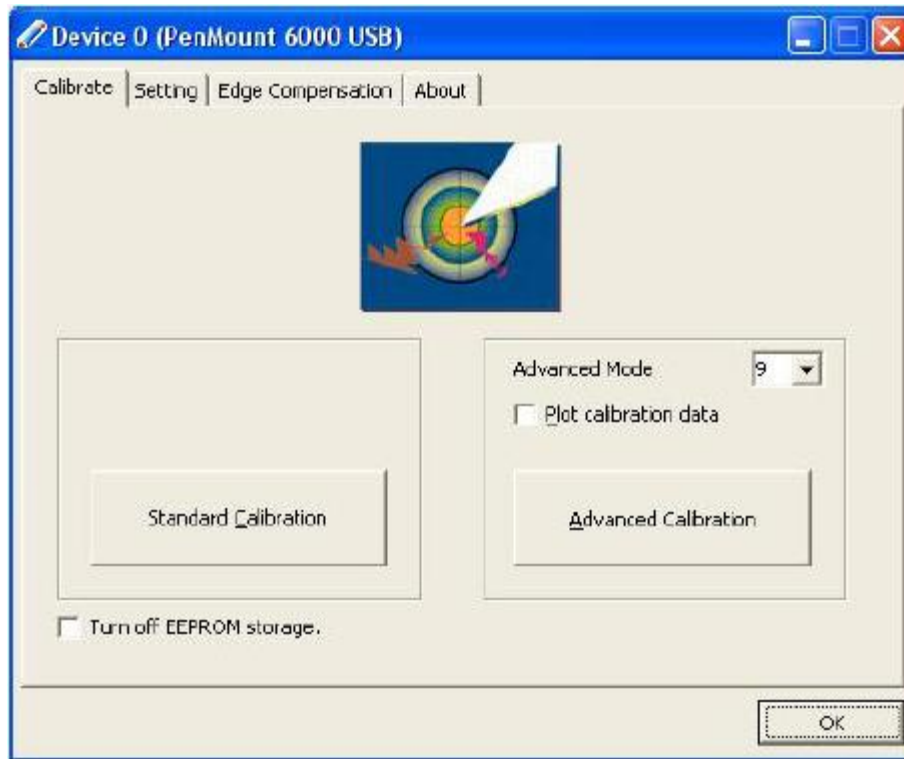

Figure 5-10: Calibration Initiation Screen

Step 10: The calibration screen in is shown. See **Figure 5-11**.

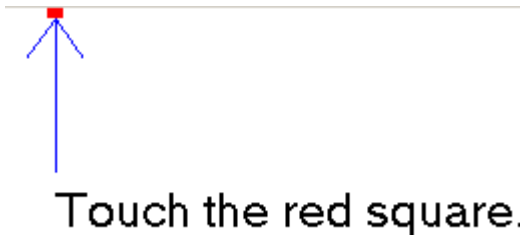

Figure 5-11: Calibration Screen

Step 11: Follow the instructions. The user is asked touch the screen at five specified points after which the screen is calibrated.

AD Boards

DM-F Series Monitor

6.1 AD Board Overview

The DM series LCD monitor AD board provides a wide variety of control interfaces. There are two AD boards used for the DM series monitors: AV-6038 and AV-60381. Refer to **Table 1-2** for a listing of DM series monitors and their associated AD board. The following sections describe each AD board in detail.

6.2 AV-6038 AD Board

The connector locations of the AV-6038 are shown in Figure 6-1. The Pin 1 locations of the on-board connectors are also indicated in the diagrams below. The connector pinouts for these connectors are listed in the following sections.

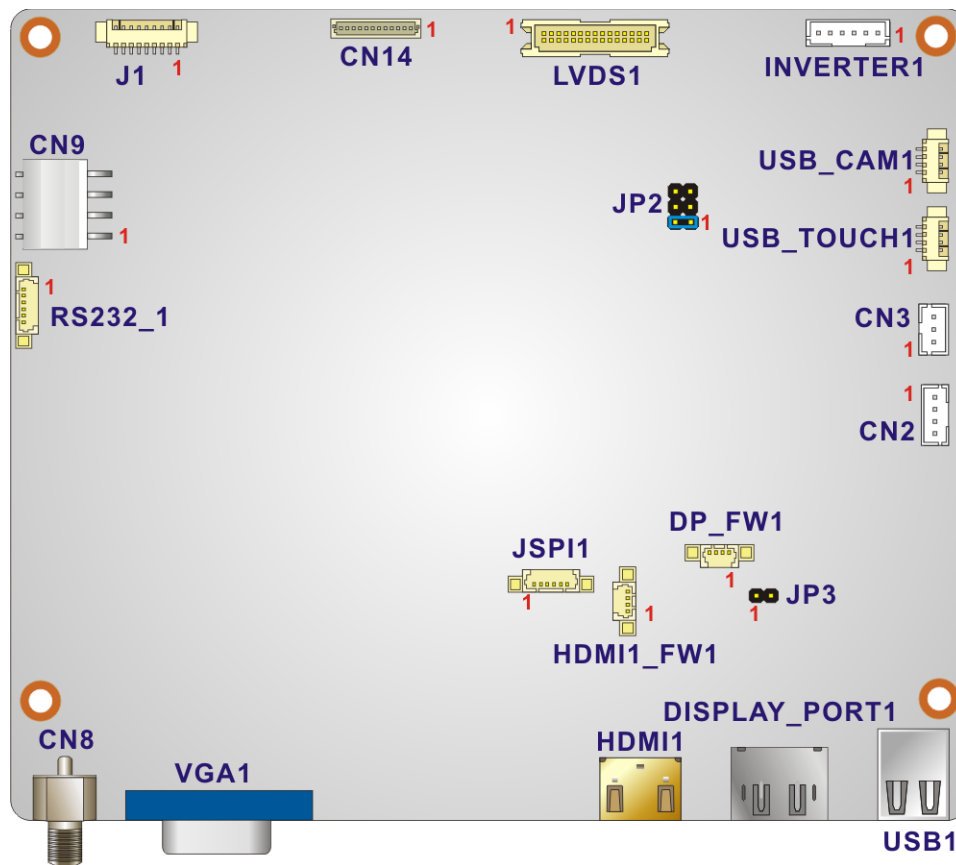

Figure 6-1: AV-6038 AD Board Layout Diagram

6.2.1 AV-6038 Peripheral Interface Connectors

Table 6-1 shows a list of the peripheral interface connectors on the AV-6038 AD board. Pinouts of the connectors that are used in the DM-F series can be found in the following sections.

Connector	Type	Label
Backlight Inverter connector	6-pin wafer, p=2.00 mm	INVERTER1
COM debug port connector	2-pin wafer, p=2.00 mm	CN2
Camera connector	4-pin wafer, p=1.25 mm	USB_CAM1
DisplayPort firmware connector	4-pin wafer, p=1.25 mm	DP_FW1
HDMI firmware connector	4-pin wafer, p=1.25 mm	HDMI_FW1
Infrared connector	2-pin wafer, p=2.00 mm	CN3
LVDS connector	30-pin crimp, p=1.25 mm	LVDS1
OSD keypad connector	12-pin wafer, p=1.00 mm	CN14
Power input connector	4-pin wafer, p=3.96 mm	CN9
RS-232 connector for touchscreen	6-pin wafer, p=1.25 mm	RS232_1
SPI flash connector	6-pin wafer, p=1.25 mm	JSPI1
USB connector for touchscreen	4-pin wafer, p=1.25 mm	USB_TOUCH1
Touchscreen connector	9-pin wafer, p=1.25 mm	J1
Jumper	Type	Label
LVDS panel voltage select jumper	6-pin header, p=2.54 mm	JP2
EIDE firmware update jumper	2-pin header, p=2.00 mm	JP3

Regulatory Compliance

DECLARATION OF CONFORMITY

This equipment has been tested and found to comply with specifications for CE marking. If the user modifies and/or installs other devices in the equipment, the CE conformity declaration may no longer apply.

FCC WARNING

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Appendix

B

Safety Precautions

**WARNING:**

The precautions outlined in this chapter should be strictly followed. Failure to follow these precautions may result in permanent damage to the DM-F Series.

B.1 Safety Precautions

Please follow the safety precautions outlined in the sections that follow:

B.1.1 General Safety Precautions

Please ensure the following safety precautions are adhered to at all times.

- ***Follow the electrostatic precautions*** outlined below whenever the DM-F Series is opened.
- ***Make sure the power is turned off and the power cord is disconnected*** whenever the DM-F Series is being installed, moved or modified.
- ***Do not apply voltage levels that exceed the specified voltage range.*** Doing so may cause fire and/or an electrical shock.
- ***Electric shocks can occur*** if the DM-F Series chassis is opened when the DM-F Series is running.
- ***Do not drop or insert any objects*** into the ventilation openings of the DM-F Series.
- ***If considerable amounts of dust, water, or fluids enter the*** DM-F Series, turn off the power supply immediately, unplug the power cord, and contact the DM-F Series vendor.
- **DO NOT:**
 - Drop the DM-F Series against a hard surface.
 - Strike or exert excessive force onto the LCD panel.
 - Touch any of the LCD panels with a sharp object
 - In a site where the ambient temperature exceeds the rated temperature

B.1.2 Anti-static Precautions

**WARNING:**

Failure to take ESD precautions during the installation of the DM-F Series may result in permanent damage to the DM-F Series and severe injury to the user.

Electrostatic discharge (ESD) can cause serious damage to electronic components, including the DM-F Series. Dry climates are especially susceptible to ESD. It is therefore critical that whenever the DM-F Series is opened and any of the electrical components are handled, the following anti-static precautions are strictly adhered to.

- ***Wear an anti-static wristband:*** Wearing a simple anti-static wristband can help to prevent ESD from damaging any electrical component.
- ***Self-grounding:*** Before handling any electrical component, touch any grounded conducting material. During the time the electrical component is handled, frequently touch any conducting materials that are connected to the ground.
- ***Use an anti-static pad:*** When configuring or working with an electrical component, place it on an anti-static pad. This reduces the possibility of ESD damage.
- ***Only handle the edges of the electrical component:*** When handling the electrical component, hold the electrical component by its edges.

B.2 Maintenance and Cleaning Precautions

When maintaining or cleaning the DM-F Series, please follow the guidelines below.

B.2.1 Maintenance and Cleaning

Prior to cleaning any part or component of the DM-F Series, please read the details below.

- Except for the LCD panel, never spray or squirt liquids directly onto any other components. To clean the LCD panel, gently wipe it with a piece of soft dry cloth or a slightly moistened cloth.

DM-F Series Monitor

- The interior of the DM-F Series does not require cleaning. Keep fluids away from the DM-F Series interior.
- Be cautious of all small removable components when vacuuming the DM-F Series.
- Turn the DM-F Series off before cleaning the DM-F Series.
- Never drop any objects or liquids through the openings of the DM-F Series.
- Be cautious of any possible allergic reactions to solvents or chemicals used when cleaning the DM-F Series.
- Avoid eating, drinking and smoking within vicinity of the DM-F Series.

B.2.2 Cleaning Tools

Some components in the DM-F Series may only be cleaned using a product specifically designed for the purpose. In such case, the product will be explicitly mentioned in the cleaning tips. Below is a list of items to use when cleaning the DM-F Series.

- Cloth – Although paper towels or tissues can be used, a soft, clean piece of cloth is recommended when cleaning the DM-F Series.
- Water or rubbing alcohol – A cloth moistened with water or rubbing alcohol can be used to clean the DM-F Series.
- Using solvents – The use of solvents is not recommended when cleaning the DM-F Series as they may damage the plastic parts.
- Vacuum cleaner – Using a vacuum specifically designed for computers is one of the best methods of cleaning the DM-F Series. Dust and dirt can restrict the airflow in the DM-F Series and cause its circuitry to corrode.
- Cotton swabs - Cotton swabs moistened with rubbing alcohol or water are excellent tools for wiping hard to reach areas.
- Foam swabs - Whenever possible, it is best to use lint free swabs such as foam swabs for cleaning.

Appendix

C

smartOSD

C.1 IEI smartOSD Quick Installation Guide

IEI smartOSD is a proprietary On-Screen-Display (OSD) software solution from IEI that enables easy, remote monitor setting adjustments in a Windows environment. IEI smartOSD delivers excellent performance and provides more flexibility than the typical OSD hardware solutions when adjusting a monitor. smartOSD also allows monitor settings such as brightness, contrast, screen position, size, color gain to be read and changed over normal video cable (VGA or HDMI).

C.2 Pre-installation Notice

Before installing smartOSD software, please make sure one of the following operating systems is installed:

- Windows 95
- Windows NT 4.0
- Windows 98
- Windows 2000
- Windows 2003
- Windows XP
- Windows Vista
- Windows 7

C.3 smartOSD Installation

Connect the DM-F series to a host computer. Insert the CD that came with the system and follow the instructions below.

Step 1: Insert the CD into a CD drive connected to the system.

Step 2: Locate the setup file and double click on it.

Step 3: The welcome screen shown in Figure C-1 appears.

Figure C-1: smartOSD Welcome Screen

Step 4: Click **Next** to continue.

Step 5: The Folder Select screen in **Figure C-2** appears.

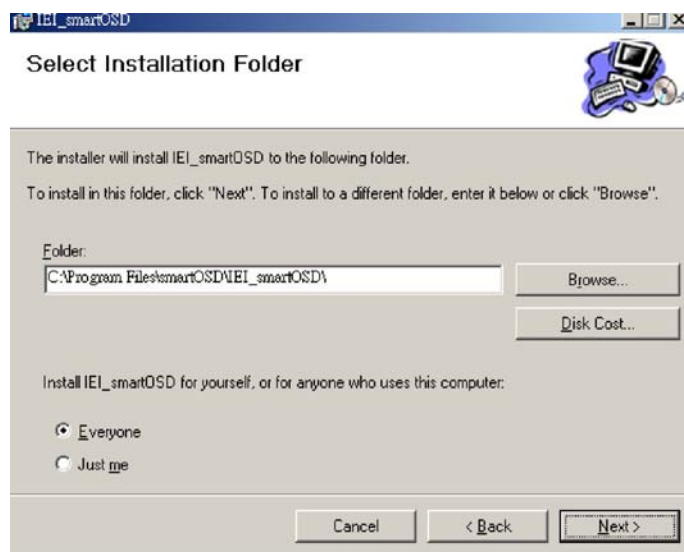

Figure C-2: smartOSD Folder Select Screen

Step 6: Select the installation folder in Figure C-2 shown above.

Step 7: Click **Next** to continue.

Step 8: The screen in Figure C-3 appears.

DM-F Series Monitor

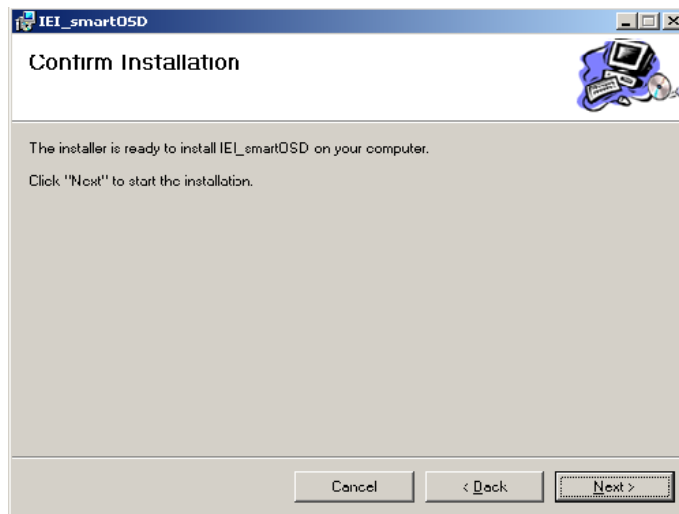

Figure C-3: smartOSD Confirm Installation

Step 9: Confirm the installation by clicking **Next** in the screen above.

Step 10: The program starts to install and the progress bar shown in Figure C-4 appears.

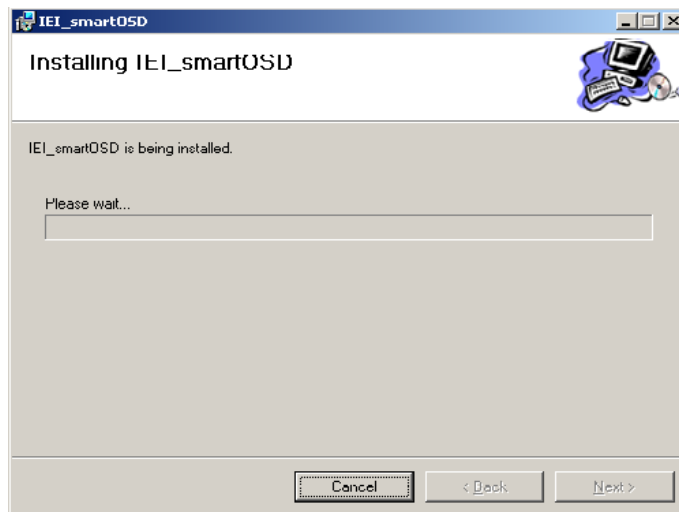

Figure C-4: smartOSD Installation Progress

Step 11: When the installation is complete the "Complete Installation" screen in

Figure C-5 appears.

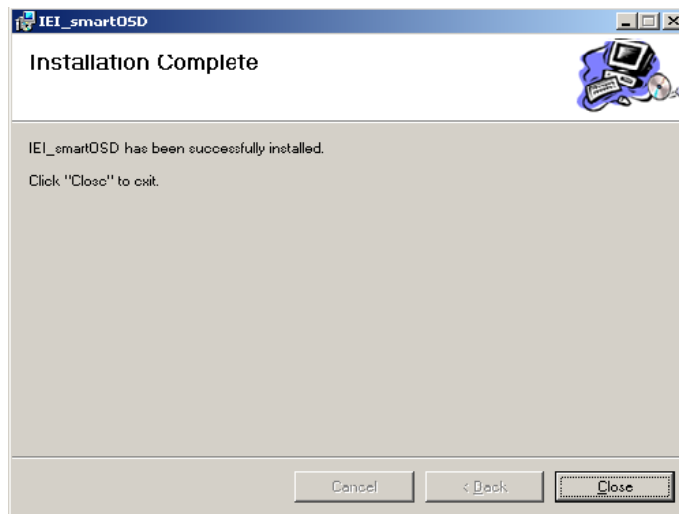

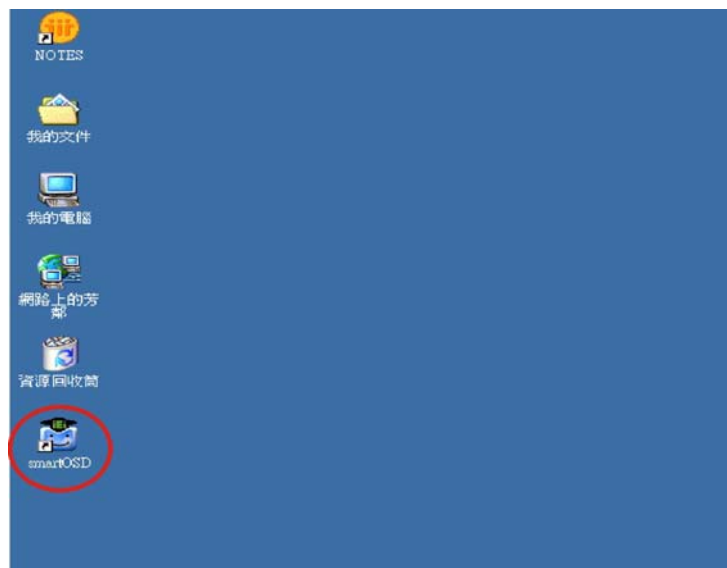

Figure C-5: smartOSD Installation Complete

Step 12: Click **Close** in the screen above.

Step 13: After quick setup is complete, the IEI smartOSD wizard logo appears on the desktop as shown in the screen below.

Step 14: To access the smartOSD, click the smartOSD wizard logo.

C.4 Software Illustration

The table below shows the smartOSD menu structure for all IEI LCD monitors.

C.5 smartOSD FAQ

For troubleshooting, please see the steps below:

C.5.1 Windows 2000 Installation Failure

Installation fails under Windows 2000 and shows the following image:

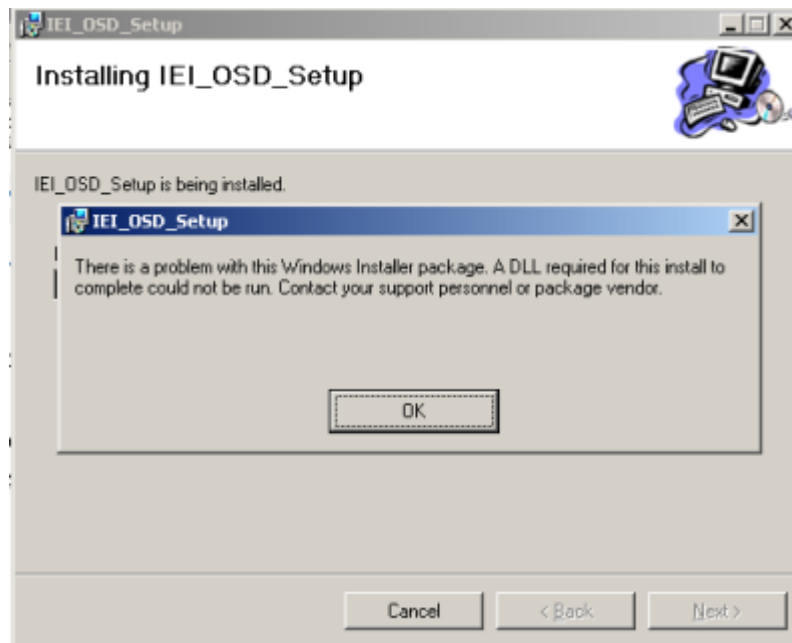

Figure C-14: DLL Missing

Solution: Download and install service pack Windows Installer 3.1

C.5.2 Vista Installation Failure

Installation fail under Vista while showing following image:

Figure C-15: Windows Vista Error

Solution: Install SmartOSD.exe as the administrator authority

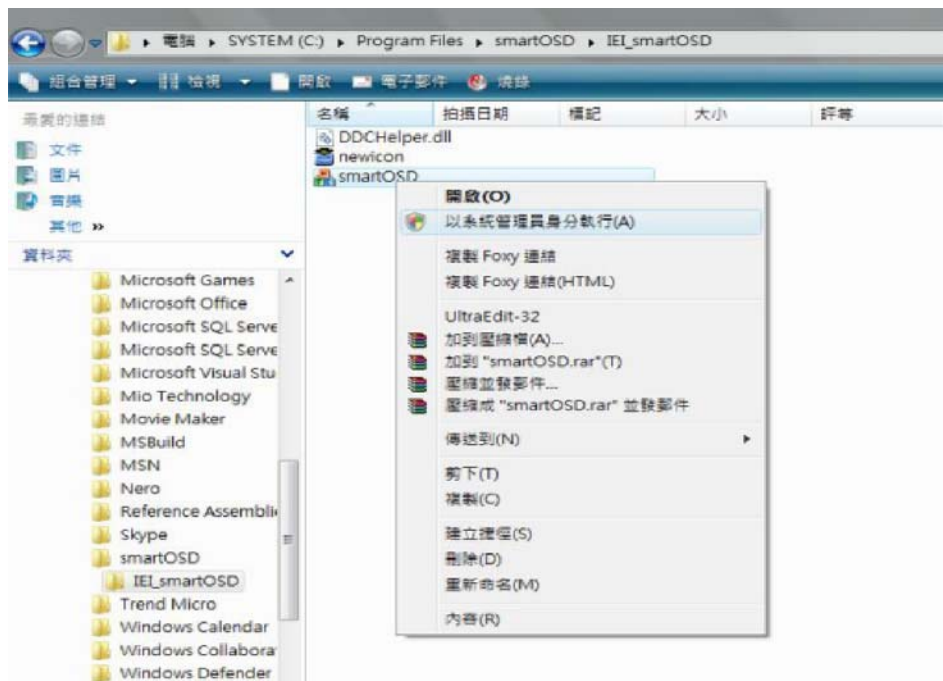

Figure C-16: Install as Administrator

C.5.3 Model Failure

The Model Fail error message shown below appears.

Figure C-17: Firmware Incompatibility

Solution: SmartOSD only supports firmware version 2.0 and following versions.

DM-F Series Monitor

C.5.4 DDC Port Failure

The DDC port fail error message shown below appears.

Figure C-18: DDC Port Failure

Solutions:

- Check VGA or HDMI cable
- Check an IEI monitor is being used
- Make sure the version is version 2.3 for the AFOLUX/MDM series and version 1.5 for the DM/ISDM/TDM/SRM/LCD-KIT series that have the SmartOSD functions
- Check if the OSD control status is busy. A busy signal may cause the signal message for a short time.
