

# CF-1916

One Slot Compact Flash to IDE

## Specifications

|                       |                                                                       |
|-----------------------|-----------------------------------------------------------------------|
| Features              | ATA to standard IDE interface                                         |
| Status                | Power LED                                                             |
| Indictors             | IDE Active LED                                                        |
| Connectors            | 2.0mm 44-pin box header for IDE x1<br>Type I/II Compact Flash slot x1 |
| Weight                | 55g                                                                   |
| Board Size            | 90 x 96mm<br>(3.54 x 3.77 inches)                                     |
| Operation Temperature | -20°C ~ +70°C<br>-40°C ~ +85°C (Optional)                             |

# ICOP-0091

PC/104 Interface to ISA Bus

## Specifications

|                                                     |                                                                                          |
|-----------------------------------------------------|------------------------------------------------------------------------------------------|
| Converts 104-pin PC/104 interface to 98-pin ISA Bus |                                                                                          |
| Status Indicators                                   | Power LED for +5V, -5V, +12V, -12V x4                                                    |
| Connectors                                          | 2.54mm 104-pin socket for PC/104 interface x1<br>98-pin Gold finger for ISA interface x1 |
| Weight                                              | 34g                                                                                      |
| Board Size                                          | 134 x 33mm<br>(5.27 x 1.3inches)                                                         |

x-ISA Interface to ISA Bus

## Specifications

|                                                   |                                                                                                                                                     |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Converts 64-pin x-ISA interface to 98-pin ISA Bus |                                                                                                                                                     |
| Status Indicators                                 | Power LED for +5V, -5V, +12V, -12V x4                                                                                                               |
| Connectors                                        | 2.0mm 64-pin socket for Mity-Mite x-ISA interface x1<br>2.54mm 64-pin socket for Tiny x-ISA interface x1<br>98-pin Gold finger for ISA interface x1 |
| Weight                                            | 34g                                                                                                                                                 |
| Board Size                                        | 134 x 33mm<br>(5.27 x 1.3inches)                                                                                                                    |
