9/8th Gen. Intel® Core™ Series High Performance and Essential Rugged Embedded Computer

## HIGH-PERFORMANCE | SIMPLICITY

### Overview

The DV-1000, with 9/8th Gen Intel® Core™ processor, is a fanless and rugged embedded computer optimized for edge computing applications. The high-performance DV-1000 processes data and makes real-time decisions at the edge, enabling enterprises to take immediate action on real-time data. The computer brings high-performance computing and industrial durability together in a compact footprint embedded computer, providing reliable long-time operation for mission-critical and space-limited applications in machine vision, manufacturing, railway infotainment, and smart city applications.

- Supports 9/8th Gen Intel® Core™ i7/i5/i3 or Pentium®/Celeron® processors (up to 65W)
- Compact size (224 x 162 x 64 mm)
- 1 x M.2 2280 key M socket, auto-detection for NVMe/SATA SSD
- 1 x M.2 2230 key E for Intel® CNVi/wireless module
- 2 x Full-size Mini PCIe sockets for module expansion
- Optional CMI/MEC modules for I/O expansion
- Wide operating temperature: -40°C to 70°C
- Military standard (MIL-STD-810G) shock & vibration proof

## Strong Computing Power

The DV-1000 features a 9/8th Generation Intel® Core™ i7/i5/i3 (Coffee Lake-R S series) processor and Intel® H310 chipset, supporting up to 128 GB of DDR4 2666 MHz memory. The DV-1000 provides plenty of power for heavy multitasking workloads and applications.

## Compact Size

The DV-1000 packs its impressive computing power in a compact size computer with a footprint only about half the size of one sheet of A4 paper. This small size makes the DV-1000 easy to install anywhere you can imagine, especially in space-constrained industrial environments like a small cabinet in a factory.

## Essential I/O and Connectivity

DV-1000 has the most frequently used I/O (LAN, USB, COM ports), analog and digital displays (VGA and DP), and storage options (SATA HDD/SSD, mSATA, or NVMe) sufficient for most industrial applications.

## Expandable Extra I/O and Functionality

For adding extra I/O or functions Cincoze offers proprietary Combined Multiple I/O (CMI) modules, Control Function Module (CFM), and also Mini-PCIe Expansion Card Module (MEC). The CMI modules support HDMI, DisplayPort, COM and DIO, MEC modules support GbE LAN and USB expansion, and CFM modules have IGN function.

- | 35W TDP Processor : -40°C to 70°C
- | 65W TDP Processor : -40°C to 60°C (with external fan)

## Reliable Cooling and Wide Operating Temperature

Even in a small form factor, the DV-1000 has an excellent thermal design enabling wide operating temperature from -40°C to 70°C with only passive cooling. An external fan is available for an active cooling solution for higher temperature operations and to ensure continuous operation for space constraint cases or processing power requirements.

## Industry Certifications

The DV-1000 has been tested to meet a range of industry standards, including MIL-STD-810G to ensure reliable operation under harsh shock and vibration, and EMC compliance EN50155 (EN 50121-3-2 only) for rolling stock deployments.
